TARBORO, N. C. THURSDAY, SEPTEMBER 17 1891.

PRICE FIVE CENT

ELI HOWELL.

C. W. JEFFREYS

HOWELL & JEFFREYS,

GENERAL MERCHANTS,

Standard Granulated Sugar 5 cents a pound. Good Family Flour at \$5.50 per bbl. Other goods equally as cheap.

How's Your Liver?

Is the Oriental salutation, knowing that good health cannot exist without a healthy Liver. When the Liver is torpid and congested, the food lies in the stomach undigested, poisoning the blood, frequent headache ensues, a feeling of lassitude, despondency and nervousness indicate how the whole system is deranged. Simmons' Liver Regulator has been the means of restoring more people to health and happiness by giving them a healthy Liver than any agency known on earth. It acts with extraordinary power and efficacy, and has cured thousands of cases of Biliousness, Headache, Indigestion, Constipation, and all the ailments of the Liver. It is a pleasant, agreeable, and safe remedy, and its use is recommended by the highest authorities on the subject.

Peanut Mill.

Arriving untoward fortune Tarboro will have a peanut mill ready for cleaning with the new crop.

The foundation is being laid and already several car loads of lumber have arrived and the work will be pushed.

Captured at Last.

The young and captivating bachelor, Henry Clay Turnage of Fieldsboro, who departs more personal publicity, all wool and a yard wide than any gallant in a hundred, has at last fallen a victim to Cupid's darts and at Hymene altar unconditionally surrendered Wednesday, September 9th, to Miss Alice Jefferson, of Pitt county. Squire Frank Dupree officiating. On the same day Mrs. Turnage took him North on a bridal tour. The Southerner's best wishes accompany the genial whole souled victim and his beautiful and merciful captor.

A Dead Shot.

right at the seat of difficulty, is accomplished by the sure and steady aim of Dr. Sage's Catarrh Remedy. Don't fool around with a pop gun, nor a "flint-lock," when this reliable "Winchester" is within reach. Dr. Sage's treatment of catarrh is far superior to the ordinary, and when directions are reasonably well followed, results in a permanent cure. Don't longer be indifferent to the verified claims of this infallible remedy. \$5.00 is offered, in good faith, for an incurable case of Catarrh in the Head, by its proprietors, the World's Dispensary Medical Association, Buffalo, N. Y. At all druggists.

When to Expect Frost.

A tobacco man here the other day said there would be frost on the 29th of this month. It might not be a killing frost, but there certainly would be frost. Of course the growers besides being incredulous were curious to know why he was so sure about the date. In D.ville where he lived he said there was a cold or cool snap in August and that one month from that time frost never failed to put in an appearance.

Rebate on Jute.

WASHINGTON, D. C., Sept. 8.—The Treasury Department has modified all former regulations issued concerning the drawback to be allowed on exported jute bagging and has directed that Collectors of Customs also allow a drawback of two cents per bale on cotton of last year's crop covered with jute bagging.

Merit Wins.

We desire to say to our citizens, that for years we have been using Dr. King's New Discovery for Consumption, Dr. King's New Life Pills, Bucklen's Arnica Salve and Electric Bitters, and have never handled remedies that sell as well, or have given such universal satisfaction. We do not hesitate to guarantee them every time, and we stand ready to refund the purchase price, if satisfactory results do not follow their use. These remedies have won their great popularity purely on their merits. For sale at STATION & ZOELETT'S drug store.

Here's Your Paper Money.

A dispatch from Odessa says: The extraordinary fluctuations in roubles in the past few days have almost brought international commerce to a standstill. Business contracts are impossible. There is but little doubt that the Berlin influence on Russian exchange, and it is felt that the Autocrat will bring a serious crisis.

Another Mail.

Class, Vickery, of Richmond, Supt. of Railway Mail Service, has written Postmaster Martin asking whether

Pranks of Memory.

Great men are always eccentric, and men who want the world to think they are great begin the jugglery of eccentricity early in life and keep it up. The genuine genius has a great deal of trouble with his memory.

Henry Clay couldn't repeat a verse of any poem. He couldn't repeat the old long meter eclogue, "Prætoris Gode from whom all blessings flow," but he never forgot an argument, a name, or a face.

Dr. Leyden, the intimate friend of Sir Walter Scott, could repeat an act of Parliament after hearing its first reading. It is an old story that Milton could repeat Homer.

Charles James Fox once paid a visit to the town of Gorcum. He was relating an incident that had occurred there but could not think of the name of the town. The next day he was giving a dinner, and while carving he started his guests by calling "Gorcum, Gorcum." The name of the town had just occurred to him.

Sydney Smith pretended to despise memory. He said he saw no more sense in remembering what he had read than the dinner that had made him fat.

The story has been told for 100 years that Cyrus knew the names of all his soldiers. Emperor Hadrian could repeat 2,000 words in the order he heard them. Angelo had all of Dante and Petrarch in his memory.

It is said that Pascal knew the Bible by heart. Leibnitz could repeat nearly the whole of Virgil.

A London reporter took no notes, and yet, when an unexpected debate sprang up, and he was left alone, he could write it out verbatim. When listening he closed his eyes. He called it "being held up by the ears."

Prof. Lawson boasted that he could if the Bible were lost, repeat the whole of it with the exception of a few verses. Lord Macaulay made the same boast about "Pilgrim's Progress" and "Paradise Lost." It will be remembered that none of the works named were lost, so that the gentlemen were never put to the test.

The cow peas vine crop work on land and say \$1 per bushel for two bushels per acre for first seeding. We can collect seed after once starting the work before plowing in the crop, because it is best not to sour the land by plowing in the vines green. Hence sow early enough to mature before ground is needed and pick off pods enough for seed.

Perhaps a fair estimate on this will be found in the following:

Man and team plowing one day on one acre \$2 00
Man and team harrowing one-half day on one acre \$1 00
Pea bushes seeds at \$1 2 00
Total cost of pea vine crop \$5 00
Increased yield of wheat on plots ten bushels per acre, at \$1 per bushel, gives \$10, or a net income of \$5 per acre, where the extra handling can be next to nothing in cost.

We have said nothing of the increase in fertility of value of straw, which is well worth considering. F. E. Bury, Agriculturist, N. C. Experiment Station.

Co-operation With The Farmers.
A pair of co-operation with farmers of the State has been instituted by which the benefits of the North Carolina Agricultural Experiment Station are brought more directly before their attention. All the stations in North Carolina (numbering nearly 2,300) have been requested to form "Experimental Committees," the chairman of which is to be in constant communication with the Station Press Bulletin, as well as regular and special bulletins and reports of progress of the Station are sent to these committees, and the matters contained in them are discussed. A question-box is also used in which any member can deposit any question. After discussion by the meeting, headed by the Experimental Committee, the questions, if desired, can be submitted to the Experiment Station for answer. These questions may be embraced under any division of agriculture. Every Grange in the State has also been asked to adopt the plan. From the number of Experimental Committees which are being formed, and the interest being expressed, the plan will doubtless prove an unbounded success.

It is gratifying to note the recent meeting of the N. C. Farmers' State Alliance at Morehead passed a resolution endorsing the above plan of Experimental Committees formulated by the N. C. Experiment Station.

Pea Vine Marketing.

In the plots of wheat on which pea vines are growing has been illustrated at the Experiment Farm we have a fine illustration to make which is worth looking at. We find that for plowing an average of \$3 37 per acre raised the yield of wheat 5.4 bushels per acre. With what we'll \$1 per bushel it is easy to see what we lose on fertilizers.

The cow peas vine crop work on land and say \$1 per bushel for two bushels per acre for first seeding. We can collect seed after once starting the work before plowing in the crop, because it is best not to sour the land by plowing in the vines green. Hence sow early enough to mature before ground is needed and pick off pods enough for seed.

They Interceded with the Governor.

and he refused to grant the requisition. A long official correspondence followed. Prominent men in South Carolina told the Governor that he had not been treated with proper official courtesy by the Governor of North Carolina. The result was that the South Carolina Governor, accompanied by a large party of friends and advisers, journeyed by stage to Raleigh, the capital of North Carolina, for a conference with the Governor about the matter of giving up the criminal. The Governor of North Carolina, with a large party of distinguished friends, met the Governor of South Carolina several miles from town, and escorted to the governor's mansion with all the ceremony due such distinguished visitors. Before the object of the visit was stated the entire party sat down to an elaborate dinner. After dinner wine was served, and after wine came brandy—the application for which the old North State is famous.

After many rounds I drink the delectable and glasses were removed, and Governor of South Carolina stated the object of his visit. He demanded the surrender of the fugitive criminal. The Governor of North Carolina refused. Then followed a long and heated discussion, in which the Attorney Generals of the two States took an active part. Finally the Governor of South Carolina grew angry, and rising to his feet, said:

"Sir, you have refused my just demand and offended the dignity of my office and my State. Unless you at once surrender the prisoner I will return to my capital, call out the militia of the State, and retaining with my army I will take the fugitive by force of arms. Governor, what do you say?"

All eyes were turned to the Governor of North Carolina, and his answer was awaited with breathless interest. The Governor rose slowly to his feet and beckoned to a servant who stood some distance away. His beckoning was from and dignified as became his position. He was slow about answering, and again the Governor of South Carolina demanded, "What do you say?"

"I say, Governor, that it's a long time between drinks."

The reply restored good humor. Decanters and glasses were brought out again, and while the visitors remained, if any one attempted to refer to the diplomatic object of the visit he was cut short by the remark that it was a long time between drinks. When the visiting Governor was ready to return home he was escorted to the State line by the Governor of North Carolina, and they parted the best of friends.

The fugitive was never surrendered. —S. Louis Star.

Discovered By The People.
Many of the inventors and vendors of the various nostrums that are offered to the public today, only to disappear and be succeeded by something else tomorrow, make the most sweeping and absurd claims for them. They are braided as cure alls and it is no wonder that the public has become so suspicious. The most remarkable fact in the history of S. S. S. (for, unlike most other proprietary medicines, it has a history) is that a great many of its virtues have been discovered by the people themselves. It has never been advertised as a specific for skin cancer, and yet there are in my testimonials going to show that S. S. S. will cure it and all diseases. These testimonials are of such a character that there is no "going behind the curtains."

Lecture On Feels. Admit One.
A gentleman who lectured on food printed his tickets as above. Suggestive, certainly, and even sarcastic. What if one is they who suffer from measles of disease when they might be cured. Dr. Pierce's Golden Medical Discovery is sold under a positive guarantee of its benefiting or curing in every case of Liver, Blood and Lung disease, or money paid for it will be cheerfully refunded. In all blood taints and impurities of whatever name or nature, it is most positive in its curative effects. Pimples, Blisters, Eruptions, and all skin and scalp diseases, are radically cured by this wonderful medicine. Scrofulous disease may affect the glands, causing swellings or tumors; the bones, causing "Fever sores," "White Swellings," "Hip-joint Disease"; or the tissues of the lungs, causing Pulmonary Consumption. Whatever its manifestations may be, "Golden Medical Discovery" cures it.

"A Long Time Between Drinks."
Every man in the United States is supposed to know what the "Governor of North Carolina" said to the Governor of South Carolina, but you may be a man who does not know when and under what circumstances the famous remark was made. Nearly a century ago a man prominent in political affairs in North Carolina, married across the border and settled in South Carolina. He had been there only a short time when he committed some social crime or misdemeanor, for which he was indicted, to escape arrest he returned to his old home in North Carolina. In due course of time the Governor of South Carolina is called in question on the Governor of North Carolina for the fugitive's escape.

Co-operation With The Farmers.
A pair of co-operation with farmers of the State has been instituted by which the benefits of the North Carolina Agricultural Experiment Station are brought more directly before their attention. Southern Development.

The Manufacturers' Record of September 12th says:
The recent advance in cotton, and the assurance of the largest grain crops for many years, have still further strengthened the position of the South in all business and financial matters, and everything indicates a very active winter and spring.

The tendency of capital seeking investment must inevitably be Southward, for no other country possesses such wonderful resources, and so where else are the possibilities of profitable development so promising. The increasing importance of the South's foreign trade and the position of Southern ports as the future outlet of the West is illustrated by the fact that Galveston is to have a 1,000,000 bushel elevator and New Orleans one of 300,000 bushels capacity, while the grain trade at Norfolk has developed so rapidly that the elevator there has been unable to handle the business, and a floating elevator has been secured from New York, and even one of the big coal piers is being used in helping to transfer the immense traffic from the cars to the steamships while some days ago the Norfolk & Western had nearly 600 grain-loaded cars on the track at Norfolk. This rapid growth of the export business of the South, added to the industrial development that has been going on for the last few years, will greatly enhance the prosperity of this whole section.

New industrial enterprises are daily being organized, and as this is not a speculative period, they must all be of a solid character. Among the number reported in this week's issue of the Manufacturers' Record are the purchase of 190 acres of land near Basic City, Va., as a location for powder and cartridge works, to employ, it is said, 500 hands; the organization of a \$400,000 phosphate company in Charlotte; a \$1,000,000 improvement and development company in Port Smith, Ark.; a \$25,000 quarrying company and a \$50,000 lumber company in Virginia; a \$50,000 brick company and \$50,000 coal company in Kentucky; a \$100,000 granite manufacturing company and a \$10,000 lumber company in Knoxville; a \$75,000 cottonseed oil mill in Dallas, Texas; a \$75,000 company for shipping fish from in ice from Florida to the North; a \$30,000 lumber company in West Virginia; a \$50,000 manufacturing company and a large cold storage warehouse in Baltimore. Many enterprises of smaller magnitude have been reported, and as many large and small, are being organized.

GENTLEMEN—I have suffered for years with a kind of Tetter, or breaking out all over my body, and all times these small pimples would irritate in boils. While traveling in the South last year I had occasion to try a bottle of P. P. P., which was recommended to me by a friend, and to my surprise it helped me so much that I got six bottles more, and after taking the full contents, I felt better than I had since the beginning of my trouble, and while I have no symptoms of the disease returning, I am still using the wonderful blood medicine at intervals, and am fully satisfied that I will be entirely cured of a disease that for fifteen years has troubled me. I cannot express my gratitude to you for so wonderful a benefactor as your P. P. P. (Priehly Ash, Poke Root, and Potassium). I am yours truly,
JACOB PETERS,
Traveling Salesman,
Savannah, Ga.

Warlike Preparations.
LENDON, September 11.—The number of troops engaged in the Russian army manoeuvres in the governments of Kiev, Poodolia and Volhynia is about 100,000. They are all drawn from the interior and there is no diminution of the great frontier garrison scattered along the Austro-Russian boundary. The manoeuvres are attended by the leading military commanders in European Russia, and press reporters both foreign and native, are excluded. The St. Petersburg and Moscow newspapers will be supplied by the Government with such information as it thought proper to give. It is known that the manoeuvres include the features of educating the troops

to familiarity with smokeless powder and that special attention is given to the efficiency of the new rifle, recently adopted by the Czar. A correspondent who has been visiting the Russian Southwestern frontier at Bessarabia as far as the Danube, says that troops are rapidly arriving and in large numbers. There would be the best of departure for a Russian army, advancing toward the Balkans and Constantinople.

At Turtchaf four regiments were quartered, where, last year, there were only two. At Vulkovo and Kilia five regiments had recently arrived, in addition to the men already there. At Kagal three regiments arrived about a month ago, and at Jalpouch reinforcements of seven thousand men have recently taken up their quarters. The troops are pouring at the same rate into other villages. These parts are of little consequence, apart from their situation, where an army of invasion would naturally concentrate.

The correspondent concludes that Russia at no distant date is to cross the Danube for Constantinople and that her preparations show that this time she means to have a far more violent to overcome all obstacles.

The Value of Lemons.
A writer who seeks to mitigate the suffering caused by excessively hot weather by distributing how to make simple and cooling drinks suitable for the summer season, incidentally pays a tribute to the great value of the lemon, and a medical authority has promptly written a letter confirming this commendation of the cooling, fruit, and urging its more frequent use in lieu of strong medicines, which often do more harm than good. He says that, although most people do not know the value of a glass of lemonade before breakfast, few know that the lemon is more than doubled by taking another at night also. A better way to fight a bilious attack than powders or quinine is to take the juice of one, two or three lemons in as much water as will make it pleasant to drink without sugar before going to bed. In the morning on rising, at least half an hour before breakfast, take the juice of one lemon in a tumbler of ordinary or soda water.—Chicago Herald.

The Third Party.
President Baier, of the State Alliance, gave your correspondent a special interview regarding the "Third Party" matter. He said: "The Third Party cannot necessarily be said to be on its feet in North Carolina. If you go into the country and talk to good men they will tell you that it is necessary, and nothing else will do, they will favor the Third Party. A great many good men will say this, but it merely expresses their desire for relief and the necessity for such relief. They look to the leaders for support. They trust them. It is not that the Third Party were to say that there were no other means of relief they would go with them and our task in this Third Party enterprise. No dictatorial leadership can bring this about. These people must be the need of third party themselves in addition to the Third Party must have the assistance of the men upon whom they depend. In other words, if they were not down upon and could get no relief they would resort to these extreme measures. The necessity for such measures can only result from an indiscreet action. If the movement were started it would astonish you to know how many people would go into it. But to start it, both sides, those in and those out of the Alliance, would be to blight it. I have no apprehension of the Third party in North Carolina, because the formation of that party would be the result only of bad management by the Alliance and of an extreme position taken by the order. I do not believe it will take such a position or that those outside of the order will be governed by prejudice. Some persons claim that the Third party may be formed by people who are opposed to the Alliance and forming what they might call a straight Democratic party, but I have no idea of any such thing. There is too much patriotism in the State, and the Alliance will give no rational cause for any such movement."—Wilmington Messenger.
