HIDDÉN ISLANDS IN OCEAN

There is a Group of Sunken Islands Between Honolulu and San Francisco Which the Government Should Locate.

Sunken rocks in the path of sailing vessels plying between San Francisco and Honolulu and tiser. San Francisco and Tahiti may have been the cause of the mysterious disappearance of many such vessels in the winter time. These rocks do not now appear on charts of the Pacific Ocean, yet their existence was vouched for more than half a century ago.

Capt. B. F. Chapman, formerly a resident of Tahiti, and now of Honolulu, who was a ship's cap tain in the coast Tahiti trade for

The cable dispatch which ap Tacoma for a "lost" island between San Francisco and Tahiti, recalled not only the story of the "lost" island to his mind, but the sunken

rocks as well. was discovered by the bark Du-Mont de Ville on a voyage from San Francisco to Tahiti," said Capt. Chapman yesterday, "but I the effect that a 'cluster of five islands hereabouts' was to be watched for. The chart gave them somewhere between 16 and 17 south latitude and from 130 to 132 west longitude The queer thing about these unknown islands, or this island, is that some one apparently gets a gimpse of it, and then afterward no one can locate it.

"There is a group of sunken islands between Honolulu and San ment's time and money to locate. Coast Line water tank, but this was the location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put out before it had burned over a location should be put on the put of charts, for I believe that in the winter gales many vessels which have mysteriously disappeared have run upon these sunken peaks | cinders from a potato train fell in and gone straight to the bottom. the grass on the road's right of way A United States sloop-of-war left not far from the water tank. These Honolulu for Panama somewhere heard of again. But one piece of rapidly and spread in every direcwreckage was ever found to indi- tion where there was material to cate what; became of the warship. I believe that she ran onto this well as the grass, although green in had their day. They will not be tasteful later on, and we feel inclingroup of sunken rocks, with every thing lashed, and went down with everything and everybody on

"One of these rocks is three fathoms from the surface and the next peak is five fathoms. They are difficult to locate, for the water does not always break over

them. "The sunken rock is known to to me as Redit's Rock, named af. ter a vessel which discovered it and which flew the Tahitian flag. Funeral Directers and Embalmers When I was last in Tahiti I determined to ascertain more about this rock.

"In 1850 the schooner Hana, bound from San Francisco to Papeete located the sunken rock. The vessel hove to and sent out a boat. The distance to the highest again. peak was ascertained to be about five fathoms.

"One of the crew in that boat was Tom Briggs, who is yet living in Papeete. The last time I was in Tabiti I invited Tom to dine with me, and asked him about the sunken rock. He told me that latitude of the Faralloones. An- the time without being benefited. Hanna by Herrick and Platt by other vessels to locate the rock, it tive in curing all Lung and Times-Union.

out to find it. "This rock or group of rocks is 50c, and \$1.00. probably between 800 and 900 miles west of San Francisco. For On each Tuesday and Thursday many years a notation appeared On each Tuesday and Thusday during the month of June, special ten day coach excursion rates will be in effect to St. Louis and return via C. attached. Nowadays no reference attached. Fast vestibuled trains with through is made to it upon charts. When I pose he For further information, addrsss, from Briggs to the Maritime Exchange. I did so, but don't know whether it has deterimned to re-

place the warning on charts. "There are other islands in the small general sailing vessel track which have been 'lost.' Copper and Henderson islands are the names of them. I once sent out a vessel to find Henderson Island, as it was supposed to be a guano

The "lost" island referred to in the cable dispatch yesterday may er th' matther.-Judge,

have reference to De Greaves' Island. Capt. Greaves, once a sea captain, and later the attendant at the Honolulu morgue, claimed to have located an island with guano | Arise The Men of The New Time; What Wi deposits many years ago, Capt. Lawless, of the Australia, when the vessel was on the Tahiti run, also sighted an island which was probably the De Greaves discovery.-Pacific Commercial Adver-
