The lands of the Board of Education present two problems; first to of labor. When shut downs occur determine the portion which is mants, but until man recognizes in manufacturing plants and the suitable for agriculture and elimiand acts upon the fact that he has farms are accessible the idle labor nate it for farms; second, to devise means for replanting the open lands, which are of large extent. In addition to the public lands the private forests are so extensive as to rank among the State's most important natural resources, a large part of them being on mountain land suited only for forests, and protecting them from fire.

The forest interests of North Carolina rank third among its industries. The necessity perpetuating the lumber manufacturing businesss of the State and the relation of the mountain forests and the denunded lands of the Piedmont plateau to the water power and cotton manufacturing interests will make the adoption of a permanent forest policy by North Carolina a very important step in its commercial

history. It is also important that the In hard times the farmers do forests in this county be preserved not offer a mine of wealth and and tree planting or growth luxury to the idle from the manu encouraged.
