One correspondent gravely assures the public that there will be no anti injunction plank in the p'atform, while another asserts with equal solemuity that the anti-injunction plank is already drawn. Still another states that there will be no free silver plank and is in turn contradicted by a brother scribe. It is true, however, that when in New York recently Mr Bryan did say positively that there would be no free silver plank in the platform, explaining that this was not because of any change in his o an convictions, but because of changed conditions which rendered unnecessary at this time any reiteration of his well known views on this subject. It is a further reasonable assumption that the platform will condemn the shilly. shally fir arcial legislation of the republicans and the creation of a 'National Monetary Commission' which, from its very composition, is bound to report to Congress in favor only such form of financial legislation as is satisfactory to Nelson W. Aldrich, senior Sen tor from Rhode Island, and his Wall

pense. Both are needless f your roof is Amatite.

When you finish faying Amatite, take away your ladder, pick up your hammer and knife, go away and leave the roof to take care of itself. A few years later you may go back and look at it if you care to, but it won't be necessary, and there won't be anything to do.

This is due to the fact that Amatite has a real mineral sur-face—a surface that is too strong to need protection—too durable to require painting.

If you buy one of the smooth surfaced roofings you will have to paint it every two or three years to keep it from leaking. In fact, such roofs depend on the paint almost entirely for their waterproofing qualities. · A matite on the other hand depends for its waterproofing upon double layers of Coal Tar Pitch, -the greatest known enemy to

Amatite comes in rolls of 110 square feet ready to lay. No special tools are required, and anyone can lay it properly. A Sample of Amatite will be forwarded free on request. Send for it and see how much better it is than the kind which requires painting to keep tight.
