CHAMPION LONG WORDS. A question raised as to the long est sentence ever written has led to a search for the longest word. The houors in English appear to rest-between "antidisestablish-mentarianism" and "honorificabilitudinity," the former word scoring 28 letters and 10 syllables, as against 22 letters and 11 sylla bles in the latter. Two other words -"disintellectualization" and "in circumscriptibleness"-may be commended to policemen in search of fresh tests of sobriety. These words, are, of course, easily sur passed even ln English by "iso metricmonitronamidobenzonphtylamides," and other germs of scientific phraseology, while in German are found innumerable instances of thirteen syllabe words such as "Suelpaardelooszonderspoorwegpetroolyting," the Dutch for motor car.—Baltimore Sun
