THE LIQUOR UGESTION. Neither Taft or Bryan said anyhing he could help about the rum Emperor of Austria is The Oldest estion, but there is no single quesesting as that. No problem, not even the currency problem; has more need to be treated by experts, or is getting ess expert treatment. The current cal, partly political, partly moral, partly religious, and partly econout it is almost all bullheaded

inexpert. It is not so much a treatment as a war, and like wars it is This is the more remarkable on ac justified by results. No doubt our considerable improve ments are bound to start in that way. 1908.

with a rampageous popular movemen that is strong enough to win respectat attention and get things done. ewers, distillers, and saloonkeepers

would have beaten them out of sight. The strength of the rum interest has been very great, and the material President ever since. inducement to minimize legislation has een enormous. It took a huge brute to overcome the massive obstruction of the vested liquor interests. But now that has been done. The ram pageous antirumites have got the en tire alcohol purveying sodality scar ed blue, for fear their whole business is to be confiscated.

And it will be confiscated if antirumites get free swing. They hold that every form of alcohol is bad in any quantity for every sort of huma creature. If they get laws passed to suit them and it turns out, as in the case of the Army Canteen, that their laws work mischief to the per sons whom they effect, they say, "No matter; the laws are right; it is the folks who are bad." Which is funny. Perhaps man was made for liquor law and not liquor laws for man, but for our part we don't think so.

But the gist of the situation seems to be that of the antirumites, with a lot of drastic and reckless legislation, have got the liquor people. scared that they are eager to accept any regulation that will make their business tolerable to society. Furthermore the agitation has stirred up great deal of earnest study of the nature, uses and effects of alcohol and though the doctors disagree, and the wise take opposite sides, the inquiry is very wholesome indeed.

The time seems ripe therefore for a considerable amendment and imhabits, both by legislation, and by the efforts of the influential liquor men and brewers to put their business on a safe basis. When the brewers and liquor dealers talk about the abolition of the saloon, and the bar, as they exist, and the substitution of the "old-fashioned restaurant saloon," where folks can sit down to their beverages, we have come forward some distance.

This can never be a teetotal country, but it can improve—and perhaps diminish its drinking very much; and though most of the improvement mus come from the increase of intellibe done to help by intelligent regu- six .- New York Press. lation, both legislative and personal.-

A GAME OF STRATEGY.

When one sees how popular the game of shogi is here," writes a traveler in Japan, "it is easy to understand the superiority of the Japanese as strategic officers. The game is played on a board and is in some respects like chess. Each player has 20 pieces and the direc tion in which they move is indi cated by arrows on the top or smaller end of the pieces. A cap tured piece is not laid aside, but are bent into a half hoop shape, becomes the property of the captor
