

SEE

THE BREATH TAKING LIGHT DEMONSTRATION

Wednesday, Oct. 21, 8 p.m.

at the

Tryon School Auditorium

IT IS FREE!

This remarkable show is divided into three periods of fascinating exhibitions demonstrating lighting for the future. It will be a delightful revelation to children and adults.

You will see for the first time the only portable colorama in the United States. This remarkable device paints the beautiful colors in any shade of light in the spectrum or arrange hundreds of patterns. People of the future will use this machine to paint the interior of their homes.

Every school child should see group two of this show when we demonstrate the marvelous effects of ultra violet radiation for health.

"Light for Seeing" shows the effects of light on various articles such as statuettes etc., high lights and shadows in architecture.

You will enjoy it.
