## Child Swallows Needle Without Serious Harm

Allen Ravan, 4-year-old son of Mrs. Viola Ravan, swallowed a needle last Saturday. The child was taken to St. Luke's hospital where he was placed under an X-Ray. The needle was seen going through the child's lung and doctors had to wait until the needle moved before operation. The needle traveled around inside the child's body and the operation was performed on Monday. The needle was removed from the lower part of the stomach. So far he is apparently doing well. Just another example of the medical service given at St. Luke's hospital.
