## EDITORIAL

By RICHARD JACOBS

The interest taken by our members has established itself in a very substantial way in the past few weeks. During this long period of rainy weather the club room has been open day and night, but we haven't had large crowds at any time. The members who come out feel very much more at home and seem to enjoy the fellowship as much as the games. Many of our troubles have been solved. Everyone however, has been patiently awaiting an opportunity to go to work on our new rooms. Many of the boys showed up for work and we succeeded in cleaning up the basement enough to permit the plumbers and carpenters to install plumbing fixtures and partitions for the shower baths. The materials for this work were held up a little bit, but are now on hand, which will permit us to do a great deal of the work in the basement before we move upstairs. (All of the work on the club being done by our members as a contribution to the club). The boys are as anxious to get to work as they are to play, in fact, play fell to a very low level as the boys stood by to get to work on the club, already built in their imagination.

As this editorial goes to press, Earl Parker is building benches and preparing to set up his machinery to repair and build furniture. This probably means as much to the club as anything that has happened since the club began. Mr. Parker will be running the furniture business as a prive enterprise during the day, at night he will instruct boys how to do the work he does and to build many useful things for themselves. His services come to the club as a contribution from Mr. George Miller and himself. Definite plans

have not yet been made as to the arrangement for instruction of the boys. At the present time the most important thing to us will be the use of the shop in which we can make furniture, tables, etc., for use in the club room. Many of our members are skilled at this work and are ready to go, as soon as the materials and machinery are ready.

## SPORTS

The boxing team has laid off work for the last week, thinking there would be something to do at the club room, and will continue to stand by and help with the work in the rooms until we get established in our permanent home. The weather has been so
