Prices Too High

President Roosevelt speaking in Washington today stated that prices on producer's products such as steel and copper, had risen two and three times above the increase in wages. He didn't know what could be done about it, but that he had instructed government agencies to buy less of producers goods and more of consumers goods. He thinks the price of merchandise should not rise out of proportion to the increase of labor.

700 Horses Here

The little white horses you see people wearing, 700 of them were sold at Buchanan's today. Mr. Buchanan sold half a box of them on the way from the Post Office to his store. As soon as people learned they were here they sold like hot cakes instead of horses. More have been ordered. The horses originated in Japan and through courtesy of C. E. Allen Co., Atlanta, more have been secured from New York. Mr. Buchanan got in a shipment of 700 last week and they were gone in a few days. So altogether 1,500 horses besides the one across the railroad tracks, are helping to advertise the Horse Show. Chairman George A. Cathey of Reservations states that the seats are nearly all gone now and the problem is to take care of the crowd on Horse Show day.
