Rooster Swapping Important Event

Horse trading has been going on for ages, but as far as it is known locally Rooster Swapping on a big scale was first conducted in Polk county on Tuesday when County Agent J. A. Wilson and T. N. Wilcox, who has made a state-wide name for himself by raising purebred egg producing chickens, went over the county to nine different sections swapping purebred Barred Rock cockerels for fryers and common roosters without any pedigree. The fryers and roosters traded in were sold to Hotel Tryon and Jackson's store where they will eventually go into chicken dinners. Much enthusiasm was shown by the farmers who bought 25 high bred birds to head flocks on 20 different farms. It is estimated that if one of these cockerels sires 25 daughters which will lay even two dozen eggs more than the daughters of the average cockerel that would mean the cockerel had increased the eggs on that farm to 50 dozen. If all the 25 cockerels do as well that would mean 1250 dozen extra eggs in the county on these 20 farms and at 25c per dozen would be an increase of over \$300. Many farmers are interested in having Rooster Swapping Days twice each year, once in the spring and once in the fall.
