## Civic Achievement

With the Town of Tryon doing a lot of good work cutting grass and fixing streets here and there for beauty and convenience and private individuals improving their property all over town, another worthy project was started this morning by the WPA at the Tryon school house where a stone wall is being built on the hillside. It will be 180 feet long and about 15 feet high in terrace formation dropping back in terraces about five feet with the slope of hill. Appropriate flowers and shrubbery will be planted on the terraces and an eye sore will be turned into a thing of beauty for all to enjoy. The rock wall will be made of stone donated by Tom Costa. E. G. Vollmer will donate his services in setting out the plants; the WPA is donating the labor; the Parent-Teacher Association is furnishing the necessary money, and friends here and there are cooperating to make the project a success. If the money holds out it is hoped the wall will be completed in about two months.
