## Won't Happen Again This Century

According to Prof. Lewis Burchard and the World Almanac today is the first time since 1882 that Good Friday has fallen on the exact day that Christ was crucified, and Sunday, April 9th, will be the only Easter Sunday during the 20th century that will come on the same day of Christ's resurrection. Historical statistics show that Christ died on April 7th and rose again on April 9th. The Council of Christian churches in 325 A.D. decided that Easter shall be on the first Sunday following the Paschal Full Moon and the date may vary between March 22 and April 25. The principal reason for this was that the pilgrims needed moonlight to travel on their way to the great yearly festivities.
