Better Things Result From Clean-Up Week

Better health, better business, better thoughts are among the possible benefits to Tryon as results of a successful Clean-Up Week, according to the slogan chosen by the Tryon Garden Club, to be shown on the screen of Tryon Theatre during the week of April 1 to 6.

That is the date of Clean-Up Week, toward which several agencies of the town are already working. The prospects are for a greater interest than ever this year, not only in the actual period of Clean-Up Week, but in permanent continuing work that will make the town more and more attractive.

Foremost in the activity are the schools, which are organizing a variety of contests. The Girl Scouts and Boy Scouts are each working on a window display, one to be shown in the shop windows of Mountain Industries, the other in the windows of Blue Ridge Weavers.

The Town administration is cooperating in every possible way, and will remove all accumulated trash, as it did last year. Containers are to be placed about the town and the public is urged to help by having all trash collected and ready for the Town trucks to remove during Clean-Up Week.

The Garden Club is taking care of all expenses, except that incurred by the town in trash removal, and is soliciting contributions for that purpose. Even the smallest contribution will help. All sums of whatever size should be sent to Mrs. Raymond P. Dodge, the treasurer.—G. S.

Cooperative Order Of Lespedeza Distributed

The County Committee for the AAA has just finished distributing a cooperative order of lespedeza to farmers in order to assist them in earning a greater part of their soil building allowance. By the assistance of the County Agent they purchased 18,400 pounds of certified Korean seed from B. B. Miller, at Mt. Ulla, N. C. These were excellent seed and up to the usual high standard of seed coming from this farm.

Seven demonstration pastures are being put on in the county in cooperation with the Plant Food Institute, and other fertilizer agencies. Soil samples from these plots have been taken and sent to the college for testing for acidity. Five of these demonstrations are in cooperation with F. R. Farnham and two are with T. L. Case.

RECREATIONAL MEETING

On Wednesday night February 28, the regular monthly recreational meeting under Dr. W. P. Jackson was held at Green Creek Gymnasium. About 50 young people participated in the games and folk dances with an equal number of observers.

During the meeting the group was shown a copy of the 1940 4-H plan of work which carries a portrait and is dedicated to Dr. Jackson.

The meeting was one of the most successful ever held in this county, which shows that Dr. Jackson's influence is spreading and along with it there is coming an even greater appreciation of his work.
