

\$3,880.62 In Dividends

PAID TO 149 INVESTORS

This remarkable distribution of wealth has just been made by the Tryon Federal Savings & Loan Association. It represents a 4% semi-annual dividend on approximately \$250,000 of savings by small and large investors.

There are a few wealthy investors who use this institution only as a medium of investing their money in order to get the largest return under a federal agency insurance protection, but the majority of the investors are people with small salaries who are paying for a home or are contemplating building a home. Some are saving for education, for travel, vacation, retirement, or any emergency. Whatever the reason

YOU CAN START NOW WITH AS LITTLE AS \$1.00

And participate in the next distribution of dividends in December. It will surprise you how fast your money will grow.
