Flies Multiply Fast

A female housefly may become a great-grandmother in 60 days. One housefly may lay as many as 2,700 eggs during a lifetime of three months, says F. C. Bishopp, entomologist of the United States Department of Agriculture. Preventive measures against this pest, says Bishopp, include safe disposal of manure, garbage, sewage, decaying grass clippings and other vegetable matter, and use of fly sprays and traps. Flies may travel several miles, so a flyless community calls for neighborhood cooperation.

Softball Results

The Bushwhackers were too hot for the Soumercos to handle in a double-header on Thursday, taking the first by a 3-2 score, and the second by a 8 to 3 score. H. Nessmith was probably responsible for the first win with a circuit blow with a mate aboard. Ruppy Capps hit for the circuit with one on in the second game. Chas. Nessmith and Ralph Swaffer pitched good ball for their teams, with "Charlie" taking the edge in the performance.

It looks as though Landrum and the high school teams are in for a hot, tight race for this evening at 6:30. Landrum has won five and lost one to the High School's four wins to one away.

1,000,000 CHEVROLETS BUILT THIS YEAR

Detroit, July 19.—The one-millionth 1940 Chevrolet car built in the United States has left the line at that division's Flint assembly plant, exactly one month after No. 900,000 was produced, and only three and two-thirds months after No. 60,000.

Red Cross Fund Increased

Dr. C. Arthur Lincoln, chairman of the Polk County Chapter of the Red Cross reports that additional donations have brought the local total for war relief to \$1,838.50.

Batista, newly elected president of Cuba, says European possessions in the Americas should be set free and allowed to form independent governments.
