

## CURB REPORTER

The weather for Friday: High 85; low 61; no rain . . . . Dr. Edwin G. Conklin said "To be fit for life in society, every child as well as every dog, must be housebroken." . . . . William Feather says "No person should be allowed to hold the floor more than twenty seconds at a single stretch. Time flies swiftest when no one is able to finish a sentence" . . . . In this column Friday we mentioned that there were more colored people whose property was being advertised for taxes than white in Tryon. The white people will lose their property, too, but we emphasized the colored because we have over 100 colored subscribers to the Bulletin who don't take The Polk County News. Some of the taxes are

as little as 79c. Most of them are under \$10. The longer the taxes remain unpaid the more it will cost the taxpayer. There are 39 white and 76 negroes who haven't paid their taxes. This is just written to encourage those who can, to pay their taxes this month . . . . Ten per cent less gasoline will be distributed to dealers and pleasure cars are expected to be cut 20 per cent.

Rev. and Mrs. B. G. Henry and children are at Davidson, N. C., where they went to the bedside of Mrs. Henry's father, who is seriously ill. A visiting minister from Raleigh will preach at the Baptist church here.
