RESOLUTION

In the death of Volney Barnett the staff of St. Luke's hospital, wants to go on record as to our deep sense of personal loss.

For some years he has been closely identified with and spent his working hours in the interest of this Institution. The phase of his character we would comment was his willingness at all times to help patient, doctor, nurse or orderly, when a need presented. He was mechanically minded and knew intimately the various departments of the Hospital. A fuse would blow, sterilizer fail, furnace not heat, a patient's radio not work; Volney was the trouble finder and corrected it. In the X-ray room he took much pride, seeing to the mechanical care, lubrication and other needs and knew more of the technical art of Radiograph than any of us. He was never too busy to lend a hand in putting on a plaster-cast, or lift an unconscious patient from the stretcher.

These are but a few of the things he was doing in his quiet way every day to help others. His main work in the business office speaks for itself.

In short, we learned to depend on him and to love him.

The following resolutions were unanimously adopted:

1. In the death of Volney Barnett St. Luke's hospital has lost a faithful servant, and

2. The staff has lost an efficient assistant and a valued friend.

3. That a copy of these resolutions be sent to his widow and to the Board of Trustees of the Hospital.

Allen J. Jervey,
Chief-of-Staff.
