

# Salvage Notice

---

On account of the closing of the Tryon Public School, the Town Management has taken over the duty of collecting waste paper, scrap metal, etc.

Collections in the vicinity of the Southern Mercerizing Plant will be made by Boy Scout Troop No. 3, under the supervision of Scoutmaster Ravan.

This material is urgently required for purposes connected with the war, and everybody is expected to assist in the salvage.

Everything made of paper or pasteboard is needed. Newspapers, etc., should be placed in bundles and tied around both ways. Scrap paper, kitchen cartons, etc., should be packed tightly in cartons and securely tied. Stores are requested not to destroy large cartons as these are needed for packing and should be given out for that purpose.

Scrap metals should be accumulated and held for collection.

A great many tin cans are still going to the dump. These are particularly needed and in spite of the trouble involved they should be prepared and held for collection.

Persons living outside the Town Limits are requested to deliver materials at the basement of the gymnasium, as convenient in good weather.

Waste fats should be delivered at the Ballenger Meat Market, in metal containers of one pound or more. Two meat ration points will be allowed for each pound of fat.

The following schedule of collections will be observed:

**PAPER—Every Wednesday.**

**TIN CANS—Notice will be given in advance of collections.**

(Town Manager).
