

ENTERED AS SECOND-CLASS MATTER AUGUST 20, 1928, AT THE POSTOFFICE  
AT TRYON, N. C. UNDER THE ACT OF CONGRESS, MARCH 3, 1879

# The Tryon Daily Bulletin

The World's Smallest DAILY Newspaper. Seth M. Vining, Editor

5c Per Copy

TRYON, N. C.,

WEDNESDAY, JUNE 4TH, 1947

Weather Tuesday: High 87, low 63, rain .29, humidity 46 . . . England to give dominion status to India right away. Communists have seized control of Hungary. . . . Negroes do not have to serve on the jury, a local lawyer points out, but they do have to be on the venire and have an opportunity to serve if qualified . . . One of the things Tryon Town authorities are checking on the number of dogs that have been licensed. If your dog does not have a license tag he is in danger of being taken for a stray dog and may be shot. It is against the state health law if he has not been vaccinated . . . Lake Adger has come in for a lot of state-wide publicity over Broadus McKee of Mill Spring catching a 12-pound, 3-ounce large mouth bass. State-wide notice was also given Mrs. John Kirby of Spartanburg who caught an 8-pound large mouth bass in Lake Adger. She used a bamboo pole, bream hook and minnow bait. The bass was 23 inches long . . . Skipper Chas. MacDonald reports that the Tryon Sea Scout Ship, the Seahawk, will have a swimming party Thursday night at Lake Lanier.

## Frank N. D. Buchman To Broadcast Today From Switzerland

As from: Mountain House,  
Caux-sur-Montreux,  
Switzerland.

Dear Mr. Vining,

My thoughts turn to Tryon as my birthday comes round. I remember so well the one I spent there when you were with us and many of our friends. This year I shall be in Switzerland and the Swiss National radio has asked me to give a world broadcast. I am enclosing a copy in case you are unable to hear it over the short wave.

The beam that will be reaching America on June 4th, at 5:40 p. m. Eastern Standard Time, is on HER 5, wavelength 25.28, frequency 11.865 mc; and at 8:55 p.m. EST, on HER 4, wavelength 31.46 m, frequency 9.535 mc; HER 5, wavelength 25.28 m, frequency 11.865 mc; HER 6, wavelength 19.59 m, frequency 15.315 mc.

WHUL is also taking it.

I have spent the winter in Italy and have seen men like Orlando, Count Sforza, Saragat, the General in Command of the North Italian Military District and the Governor of the Province.

There has been an amazing response among the coal fields of Britain to our industrial play, "The Forgotten Factor". 6,000 miners in one week recently saw the play and the following week their field led the whole of Britain in production. The miners say, "If every coal field could see 'The Forgotten Factor' the National Coal Board would have no more
