

"Put both hands to work" is a good rule for saving both time and labor on household jobs, but in dealing with electrical equipment it is safer not to use both hands for different tasks at the same time, says Miss Ruth Current, State home demonstration agent for the State College Extension Service.

For safety when handling any electric appliance or when changing a fuse, avoid touching anything else, advises Miss Current. If the appliance happens to be worn or otherwise defective, causing a short circuit, there is always danger of a shock. But there is less chance of severe shock if the hand is free or is not touching anything else.

Electricity, says the state agent, seeks the shortest and easiest route to make its circuit to the ground. It should be prevented from making that circuit through the body from one hand to the other.

SUNDAY DINNER

Only 75c

THE MENU:

Fried Chicken
Rice and Gravy
Candied Yams
Green Peas
Congee Salad
Banana Salad

TRYON CAFE

Nathan Williams, Mgr.

LOST: Large square Liberty Scarf. Green border. Finder please return to Pine Crest Inn.—Adv. p.

Brock Transfer and Storage Co., Inc. Local and long distance moving; crating, packing, shipping. Box 541. Phone 1446, or 663, Spartanburg, S. C. P. A. Carey, Jr., Manager.—Adv. tu. fri. tf.
