

## Col. Albrecht Transferred To Bismarck, North Dakota

Col. Frank M. Albrecht, son-in-law of Mrs. Frances N. Williams of Tryon, has been transferred from Fort Sam Houston, Texas, to the Garrison Engineer District, Bismarck, N. D., according to an article in a Texas newspaper.

Col. Albrecht was presented with a Certificate of Achievement Award by Lt. Col. LeRoy Lutes, Fourth Army Commander. The colonel has served with the Fourth Army since June 1946, when he and his family moved from Tryon following his return from overseas where he was chief engineer, construction division and later chief of operations and training, engineer division.

While in North Dakota Col. Albrecht will direct some of the work on the Missouri River Development including "Man's biggest effort to control nature." Garrison Dam in North Dakota under construction by army engineers will be the world's largest rolled earth structure. It will have 8 tunnels carrying water under the two-mile-long dam to power turbines. The object of dams on the Missouri is to reduce the effects of drouth and eliminate floods, help navigation and make electrical power. Five big dams and 120 smaller ones with numerous irrigation and power works, miles of walls and levees are on the program of development.

Mrs. Albrecht writes that it has been very cold there, 24 degrees below zero. Snowbound people are very friendly and cooperate in many ways, in assuring parents that school children are safe and will have to spend the night at a farm house because of the blizzard.

Col. and Mrs. Albrecht are making their home at Ft. Lincoln, Garrison district headquarters. Their son, Frank Mc jr. is a junior in the Bismarck high school. Their daughter, Miss Jane Albrecht is in New York City.

Restaurants keep cutting pie smaller and smaller. What this country needs is a minimum wedge law.—Pathfinder.

Violators will be prosecuted to the full extent of the law.

SUBSCRIPTION TO THE BULLETIN, OUT OF COUNTY, 1 YEAR \$4; COUNTY \$3.

## They Sell Through The Bulletin !

¶ So many people seem surprised when they learn how easily they sell things through an ad in *The Bulletin*.

¶ It isn't that *The Bulletin* is so good. It's because about 5,000 people read it *every day* for five days a week and when an advertiser offers a *good bargain* in something that is wanted by others, 5,000 people can do a lot of talking.

¶ An ad has to be honest, ring true and be what the public wants if it is a success. There are not as many suckers as there used to be. The public checks and double checks. You *can't fool people long*. If you have something worthwhile for the other fellow you can sell it through an advertisement in *The Bulletin*.
