AT ROTARY FRIDAY

Lucius E. Sayre, Tryon resident and retired paper executive, gave a comprehensive talk on the nation's paper industry to Rotarians at Oak Hall on Friday. Many hearers called it "one of the best talks before the club in many a day."

According to Mr. Sayre, the first paper was made by the Chinese in the first century and in less than 2,000 years has achieved its present position as the nation's fourth industry in dollar volume. In fact, 23,000,000 tons of paper are used in the United States each year.

The raw material of paper is primarily wood pulp, with from one to one and a half cords of wood used to produce one ton of paper. Thus, paper is the fourth largest user of wood . . . following railroad ties, building materials and furniture in that order. Mr. Sayre said that during World War II lumberjacks were removed from the pulp wood forests but that production of paper became so reduced as a result that they were returned to the job very quickly.

The Government Printing Office in Washington is the nation's largest user of printing papers, according to Mr. Sayre. It also holds the dubious distinction of producing more scrap paper to the paper manufacturers than any other source. Paper used in U. S. money by law is produced by only one manufacturer, who is able to maintain the secret and thus deny a reasonable facsimile of the real paper to counterfeiters with a resultant safeguarding of our economy.

Mr. Sayre praised Ernst Mahler, Kimberly-Clark Corporation ex-
