... let us check your
wheel alignment

Wheels that are out of alignment "drag" tires sideways, making steering hard and literally burning away rubber on every wheel turn.

We are specialists in wheel alignment checking and correcting . . . and will be glad to give your car a free check-up on our modern, accurate Weaver Wheel Alignment outfit. Maybe no correction will be needed—or possibly a few minor adjustments will give you "touch control" steering.

Our inspection is
without obligation.
