

The woodcock never sees what she eats. By driving her 3-inch bill into the mud, her highly sensitive tip feels earth, worms upon which she feeds.

* * * *

The killer "whale" is not really a whale but the largest of the porpoise family.

* * * *

Unlike most fish, the mackerel has no air bladder to give him buoyancy. Nature has equipped him with strong muscles along his spinal column so he can tuck his fins in close to his body so as to swim with a minimum of effort.

* * * *

The great brown Monarch butterfly secretes an acid fluid which is distasteful to birds, making it immune from their attacks.

* * * *

Except for vultures and parrots, wild geese live longer than any other birds, Authentic records give them as much as 70 years.

* * * *

The weird mournful cry of the loon has given rise to the phrase "crazy as a loon" but the bird is far from crazy.
