

CHESTNUTS

In Texas they are experimenting with blight-resistant Chinese chestnuts in the Davy Crockett National Park. The forester out there says this is the first experiment in Texas and he believes the first in the United States.

This may be the first extensive planting, but by friend L. B. Gibson of Fairmont and Saluda, N. C., planted blight-resistant Chinese chestnuts on the ridge back of the "Gibson Orchard" some years ago.

When I last checked on what happened, they were living, I was told, but not very promising. It will be rather interesting to know how they are doing. Standing all about them are dead chestnut trees.

Much of the dead chestnut in the mountains has been taken out of areas in which saw mills have operated. "Wormy Chestnut" is high priced timber.

When the lodge on Hogback Mountain was built great chestnut trees stood about it. They have perhaps passed.—C. O. Hearon in The Spartanburg Herald.

Ernst Mahler has returned to Tryon from a business trip to Washington, D. C.

Tryon Theatre
