

S. V. Ruritans Learn Of Cancer

Following the regular supper meeting of the Sunny View Ruritan Club on March 3, President Roger Wilson turned the program over to Dr. Vanna Magsino, Public Education Chairman of the Polk County Unit of the American Cancer Society, who introduced the

speaker, Dr. Ralph D. Junker. Dr. Junker explained what cancer is and that considerable mystery remains about what distinguishes cancerous from normal cells. He described how the application of science has improved understanding, diagnosis and treatment of cancer, but emphasized that treatment must be varied in each individual case. He went on to say that

physicians have learned the importance of working with nature by limiting use of radiation and chemotherapy so as to allow the patient's own immunological system to continue to combat the disease.

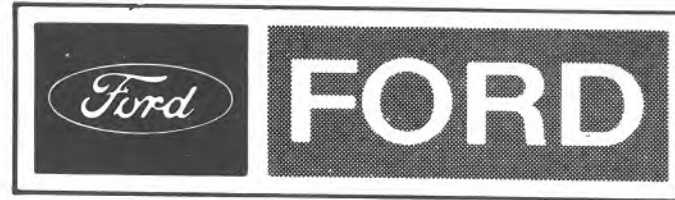

Emphasizing the need for early detection and treatment of cancer, Dr. Junker recounted in graphic terms how delay in diagnosis complicates the sur-

geon's problems and reduces the probability of cure.

MISSING from Hooker Rd. in Lynn, Wed. Evening, Spotted Female Cat, white face markings white w-grey. Black tiger collar, marking on head and back with very little tan color. She's expecting. REWARD. Day or night 859-9407. adv. 11, 12, 13,c.
