Hummingbird Circus

THIS NEW HUMMINGBIRD CIRCUS HAS A NEW FEATHER-TOUCH BOTTOM SEAL THAT GOES ON AND COMES OFF WITH A FLICK OF THE FINGER — AND WILL LAST FOR YEARS! No need to waste any nectar; the birds get it all and you clean and refill **WITHOUT** having to take it apart!

The elegant new crystal-clear streamlined bottle is the most obvious of several changes for 1980. A surge-ring has been incorporated into the expensive base die to reduce any spilling even when violently bumped. The bottle cap and bottle neck have been done away with: bottle and base are shipped assembled with an easy to clean 1 1/2 inch opening.

The virtually unbreakable reinforced red polystyrene base will not "hide" or waste nectar. Our customers usually have been people frustrated by easily-broken, hard-to-clean little feeders which the hummers use to brow-beat the poor humans who have to fill them frequently. The four perches — unknown to other feeders — will convince those skeptics who loudly proclaim that hummers don't perch! And these are **IN ADDITION** to the continuous perch around the base edge.

The combination of 8 feeding stations, 4 perches, and 16-32-48 oz. capacities simply are unequalled for the aerial displays put on by the many hummingbirds they can accommodate.
