

coins with seven sides, twelve sides, and scalloped ones, in sizes from tiny to large, struck in silver, brass, copper, nickel, aluminum, stainless steel and bronze. They are a fascinating glimpse of the nature of each participating country and a significant social record.

Mr. Wrenshall's collection contains all the coins in the series since its beginning in 1968. The Sudanese coin missing from Panel 12 has never been issued.

The exhibit is a stunning reminder that freedom from hunger is still a daily concern for the entire world one of the principal targets of the UN from its inception and still the world's most urgent need as the United Nations observes its thirty-fifth anniversary this October. Though little publicized the effective work of the Food and Agriculture Organization in increasing food production is widely referred to as the Green revolution — a force for peace in a troubled world. — Reporter

interested in this upcoming election. Mr. Gray and his staff have always been most helpful in my requests and seem to know exactly where to go for the information needed.

Being curious about the statements being made by the incumbents and the various candidates about how each of them will solve the ills affecting our Country. It seemed to me to be time to get a little information about the years of experience each of them had in Washington.

But, looking at the cumulative total of years of experience now residing in the United States Senate left me absolutely amazed, **ALMOST ONE THOUSAND YEARS!!!**

The average was almost equal to two and one half times a term in Office for a President. This meant that on the average each Senator has been in office during two or more Presidential Terms.

My lessons in Government, while in school taught me that the "Final Passage of a Bill Was Dependent Upon Approval of That Body". Amazingly the four Candidates tell us that they can cure our ills.

Frankly, I don't see how any of them will be able to cure our ills until the occupants in the United States Senate are removed after one term of office.

At this time and place I would venture to say that what we, the Voters, have in the United States Senate is "One Year of Experience Repeated Almost One Thousand Times."

Sincerely,  
William I. Sherwood
