Class Making Doll Houses

The Advanced Furniture 2 and 3 at Tryon High School have been turning out Doll Houses. Philip Pleasants, teacher of the class, said that they have been working on a mass production-type problem and set up an assembly line where each person did a certain job and the product came together in the end. Each person was assigned a particular job on the assembly line for the doll houses which were built to scale. The houses are approximately 2' x 4' and stand about 2½' tall.

Mr. Pleasants said that some of the students are also building a few of the houses to sell. If anyone is interested they may call Mr. Pleasants or leave word at the high school.
