## Fresh Fruit

By Jan Christensen, NCSU

Most fresh fruits remain at their best for only a few days, but some, if stored properly, may last longer.

How you handle fresh fruit makes the difference. Before storing fruits, sort them and either use or discard damaged fruits immediately. Most fruits, except berries and cherries, should be washed and dried before storing, recommends Rachel Kinlaw, extension food specialist, North Carolina State University.

Unripe fruits should be left to ripen in open air at room temperature and out of direct sunlight.

The length of time that a fresh fruit will retain high quality, under home storage conditions, varies with the condition of the fruit when purchased.
