The weather Thursday, high 91, low 69, hum. 48 percent.

Kirt Flynn used to edit a newsletter and he put a statement in each issue, one which we have had to use a lot lately while our minds have evidently been preoccupied elsewhere.

Kirt always said: "I tried to put something in for everybody, including those who like to find mistakes."

When swallows fly high it's considered an indication of good weather. The birds feed on gnats and flies which are found farther from the ground when warm air rises.
