OCTOBER.

BY WILLIS GAYLORD CLARK. Solemn vet beautiful to view, Month of my heart! Thou dawnest here, With sad and faded leaves to str w The summer's organization bier. The moaning of thy winds I hear, As the red sunset dies afar, And bars of purple clouds appear,

At eventide, and breathe a fervent prayer,

Coscuring every western star. It tells my soul of other lays, What ut to live was to risice-When earth was lovely to my gaze;

s or no Ch, vi ions bright oh, blessed hours, 20 to . Wh re are thy living raptures now ? I ask my pale and fevered trow!

> I look to nature and behold My life's dim emblem rustling round, In hues of crimson and of gold-The year's dead honors on the ground : And si hing with the winds, I feel,

While their low pinious muratur by, How much their sweeping tones reveal, Of life and human destiny.

When Spring's delightful moments shone, They came in zephyrs from the west, The bore the wood-lark's melting tone, They stirred the blue lake's glassy I reast; Through summer, fall ting in the heat, They lingered in the forest shade; But changed and strengthened now, they beat In storm, o'er mountain glen and glade.

How like those transports of the breaat, When life is fresh and joy is new, Soft as the hale vo 's downy nest; And transient all as they are true!

They stir the leaves in that bright month, Which hope a out her forehead twines, Till Grief's hot si he around it breathe-Then Pleasur.'s fips its smiles resigns.

Alas for Time, and Death, and Care, What gloom about our way they flirg! Like clouds in Autumns gusty air, The burial pageant of the Spring. The dreams that each successive year Seemed ha' hed in hues of brighter pride. At last like withered leaves appear, And sleep in darkness side by side.

One of very r.markable character, and of which the circuas' n'es may be fresh in the memory of some of my readers, not very long ago, in the city of Baltimore, where it occasioned a painful, intense, and will ly ext hied ex i ement. The wife of ore of the most respetable citizens-a lawyer of eminence, and a memor of Congress-was seized with a sulden and unaccountable illness, which completely baffled the skill of her phyicians. After much suff ring she died, or, was supposed to die. No one suspected that she was not actually deal. She presented all the ordinary appearances of death. The face a sumed the usual pinched and sunken outline; the lips were of the usual mar le parllor: the eves were lustreless: there was no warmth: palpi'afion had ceased. For three days the body remained unburied, during which it had a quired a stony rigidity. The furral is short, was hatened on account of the rapid advance of what was supposed to be decompo i ion.
