EQUAL in laying ability. But the hen on the right was fed a common grain ration while the other was fed Purina Chicken Chowder and Purina Hen Chow. Grains have lots of material for yolks, but far too little for whites. As they can't lay yolks only, grain-fed hens lay fewer eggs.

Purina Poultry Chows

form a complete ration, containing material for an equal number of whites and yolks. They get the most out of your hens, and cut the feeding cost per dozen eggs.

More-Eggs Guarantee You get your money back if Purina Chicken Chowder and Purina Hen Chow, fed as directed, don't produce more eggs than any other ration. Why should you put off a trial when we take the risk?
