Miracle of Miracles !! On the 4th of August, in the year 1848, sincular scene occurred in the Royal Scienti, fic Institution of France. The aged, white-headed President, his head care, his arms outstretched, his face radiant with smiles, (for science was triumphant.) and his voice with gratulatory lone, delivered the following Remort:

Report : wap, which we know, by actual practice, to cure every cutaneous eruption, every disfigurement of, and even discolored skin! Where will its magic and sin-gular power cease? The Negro, the Orcole, the Yel-low Race of the East, and the Red Man of the Far West, are alike under the influence of its extraordinary powersof clearing yellow or discolored skin, and making it white and beautiful, and of changing the color of dark, or black, or brown skin." (Here sever-al persons were brought forward by the President, who had used it, in proof of his assertion.)

There are probably few persons of intelligence who, after reading the above, will doubt the qualifies of

R. F. HIBBARDS,

Genuine Vegetable Anti-Bilious Family Pills. THESE Pills area certain cure for Fever and Ague. and Billous fever, as numerous certificates sent to the proprietors will show. The smallness of the dose, (only two pills) their energy, their simplicity, and efficacy. happily adapt them for Family and general use. The unbounded popularity and extensive sale of the pills have induced persons to imitate them, and wrap them up under a name and reputation not theirown.

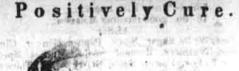

The proprietors have put up these pills in their own proper name that they may the more effectually protect them and the public from fraud, which they could not do if they had taken a fictitious name, or the name of the dead. Read the following statement: My father, the Rev. B. HIBBARD, died August 17. 1844. While in his life time, I manufactured these Pills, and put them up in boxes, and enclosed them with wrappers, with his name, by his consent and approbation ; he used frequently to say to me. "Now be very careful, my son, for if the Pills are not made good, the public will blame me." So by his active superintendance, the Pills have gained their reputation as a Family Medicine. Since his death, I have manufactured the Pills and put them up in my own name, as I deem it to be a

Clickener, by his Agent at Lancaster, Pa. Angina Pectoris, or Diseases of the Heart. Lancaster, Feb. 17th, 1845,

Dear Sir. I cannot express the obligation I am under to you for recommending me to try Clickener's Sugar Coated Purgative Pill. You know I had be n long afflicted by a complaint of the heart, which I believe the doctors call Angina Pectoris, or something cramps or pains at the pit of the stomach. Now and then it would strike up through the breast and into the shoulder blades. I never knew when it was coming on. It would sometimes attack me while walking in the street, and then I used to think how horrible it would be to drop down dead all of a sudden, with no one to have a care for me. The physicians told me it was of no use to doctor for it. It was past all cure, because none of them had ever been able to cure it. But I had heard so much about Patent Medicines, as they are called, that I deter-mined to try some of them. So I went to Philadel-phia, and called on Mr. F. Brown, who keeps the apothecaries' shop corner of Fifth and Chesnutstreets, and he gave me a box of pills. I took two boxes, according to directions, but they did no good. He then gave me a bottle of stuff. with a very out-Indish kind of name; but that had no more effect than the other. Just then I happened to hear of Clickener's Sugar Coated Purgative Pills, and as they were "something new under the sun," I thought I would try them, and if I got no better. why I must give it up as a bad job. So I called on you, as you may recollect, and bought a box for 25 cents, I began taking them, and before I had half finished the bux, I telt like a different person. I could walk much far-ther, and sometimes a half mile and back, without ther, and sometimes a half mile and back, without ther, and sometimes a half mile and back, without ther, and sometimes a half mile and back, without ther, and sometimes a half mile and back, without ther, and sometimes a half mile and back as till better ther, and sometimes a half mile and back as till better ther, and sometimes a half mile and back as till better ther, and sometimes a half mile and back as till better ther, and sometimes a half mile and back as till better ther, and sometimes a half mile and back as till better feeling any pain. The second box had a still better effect, and before I had got through with the third, the complaint had entirely left me. I am certain it is all owing to the virtues of Clickener's Pills, and nothing else, and I wish that every body should know it, because I think they are one of the greatest blessings on earth. I always keep them in the house In case any one of the family should get sick ; for I know if they could cure me of so bad a complaint, they will cure almost any body else. If you want to print this in your pamphlet. I have no objection in he world, though I am not much us d to writing. Yours, in all thankfulness MARY ANN WENDOVER.

> one of this Institution, commen I the first day of July of each year, and continued an ten Months, when there is a vacation of two months, giving the Pupils an opportunity to visit their Pa-rents and Fricads.

The Institut, in is situated on Caswell Square, a-bout one-third of a mile from the State House. The ground occupied by the buildings with that adjacent, is the property of the Institution, and granted by the Legislature of the State. In extent it embraces four acres, a part of which will be cultivated, and the re-mainder will constitute and the remainder will constitute spacious Lawns where the Male Pupils will amuse themselves, at proper hours, in athletic sports, and the Females, in walkings or such other kinds of exercise as may be appropriate to their sex.

The main building in the dimensions of its plan, is sixty feet by thirty six. It has two wings, each thirty-eight feet by twenty two, extending at right angels from the main edifice, and projecting from each extremity of it by nearly the whole width of each wing. In elevation it embraces four stories, in-cluding the basement, and the wings three, and is surmounted by a tower or observatory, commanding an extensive and beautiful prospect. In the base ment are the dining-room and store rooms, and in the story above the basement, are the parlor, sitting room and ibrary. In the other stories are the family apartments of the Principal and his assistants, and two rooms set apart for the Pupils in case of sickness. In the basement of one wing are the kitchen and wash-room, and that of the other is set apart for instruction in mechanical trades. On the principal foor of the wings, are the sitting-rooms of the males and females, and the upper story is occupied for dormitories. The chief merit of the arrangement consists in its preserving these two departments' as tar as relates to the accommodations, amusements and pursuits of the Pupils out of school, so independent in every particular, as to constitute of them two separate and distinct communities, while the diningroom in which both assemble, with the Teachers and family of the Principal, is conveniently accessible. Each department has its separate areas in the rear, its separate pleasure-grounds, and its separate communication with the school-rooms : so that for the ordinary purposes of life, there is no occasion to pass from one to the other

The Act of the General Assembly, requires that when Deaf-Mutes are unable to pay for tifeir maintenance and education, the Justices of the several Courts of Pleas and Quarter Sessions, should levy in the same manner as taxes are now by law levied for the support of the poor, seventy five dollars for the support and maintenance of every such Deaf Mute as shall be selected by the Literary Board, for the purposes of Education.
