### THE FOREIGN NEWS.

The foreign news by the last steamer is of great importance, as it indicates a general war throughout Europe. While we may look for a temporary impulse to trade and commerce, from these sanguinary operations-hum anity shudders at the prospects there. While the war lasts we may look for "better times" in this country ; but we shall be apt to pay for them in the influx of a vicious population on the return of a new process, which is said to work admirably well. peace ; quite a sufficient quantity of which we receive in the best-of times.

We think this is a mistake ; they may restore him to a tyranoical rule, but they cannot restore him to the hearts of his people. where a Prince of his character should especially be enthroned. We believe, however, the spell is broken, and the moral force of Papal Authority is in progress of being destroyed forever.

We have no hope that the disordered political clements of Europe, will settle down into a system that tower, now we are told one may be built for an will promote the civil or religious freedom of the population of Europe. But despotisms will be established on foundations less secure than heretofore. The sentiment of the people will be more hostile to governments, both political and ecclesiastical, than ever, and new systems must, in time, grow up under the influence of enlightened minds, if not with a reformation of morals.
