THE COMMERCIAL.

WILMINGTON, N. C.

TUESDAY OCTOBER 16. 1849.

WASHINGTONIAN SOCIETY. The Washingtonian Society will assemble at 7 o'clock, this evening, at Rechabite Hall, where the citizens and strangers are cordially invited to attend. The great good accomplished by the different orders of Temperance Societies, entitle them to public favor, which we hope will be awarded in the case here cited.

THE REMOVALS.

We do not know that any thing more is necessary to be said, in regard to those removals which we noticed on Saturday-except the statement of one fact, of no little importance in the case. We are credibly informed that Mr. Sullivan was not removed, but, espressly declined the office of Inspector of the Revenue.

THE PRESIDENTS RETURN.

The National Intelligencer informs us that the President of the United States returned to the seat of Government, on Friday evening last, highly gratified with the enthusiastic hospitality extended to him by his fellow citizens of Baltimore, as well as with the splendid exhibitions of mechanical skill and husbandry which he there witnessed. We will endeavor to give a full account of his trip, on Thursday.

VERY MUCH ALIKE.

We made a few remarks on Saturday, on the subject of the similarity which the Union asserts to exist between the people of the United States and those of France. The following comparison of the two Presidents is furnished by the French Journals .-Very much alike, indeed !

While M. BONAPARTE, the veteran of no battlefields that we are aware of, loves to bedeck himself with fancy uniforms, set off with broad ribardes of the legion of honor conferred upon him in his cradle. and surrounded by generals and aids-de-camp and high functionaries, and the pomp and circumstance of a travelling prince, passes his reviews; is besecched by civil, military, and religious authorities; is present at balls, and assists at dinners of ceremony, General TAYLOR, the conqueror of Mexico, an old soldier grown gray in the service, clothed in modest garb, prays that he may be spared all formal and gotten-up receptions. He wishes to be surrounded by the true people, not by that crowd of sycophants whose life is spent in rendering homage to all the men who successively arrive at power. He takes no suite along with him. His son-in-law and a single servant form his whole cortege. Citizen, General, or President, it is ever the same man-the American Cincinnalus,"

It must not be supposed that M. BONAPARTE misunderstands the character of the people over whom he rules. The French, of all people in the world, are most governed by the eye-and hence the necessity for this display. Louis XV. was an iable in disposition wise and patriotic, and the happiness of his people was the great object of his solicitude. But all his good qualities could not compensate, in the opinion of the fickle Parisians, who give direction to the affairs of France, for a clumsy person, untidy dress, and a heavy unpleasing countenance. He did not look like a king, in their estimation. President or king, the ruler of the French must be decked in parade. But a President of the United States rules best in the hearts of the people, and most engages their esteem, when he appears in the republican simplicity which characterise the dress and manners of President TAYLOR

of war, were carrying destruction of life and property to the most frightful extent. On the part of the authorities, however, it appears there was no want of firmness and energy. On the 27th of July there were 238 prisoners in the jail of Point-s-Petre. We have received Martingue journals of the 15th | for her future provincial legislation. ultimo. Things were still at sixes and sevens throughout the colony. Much disatisfaction continued to be felt regarding the amount and mode and distribution of the compensation money; and

the newspapers are a good deal occupied with grumblings on the subject, and enter largely into the principles upon which this compensation had been lecided by the radical influence of the Schoelcher party.

FIRE IN BANGOR.

BOSTON, October 12, 1849. A fire occurred in Bangor. Maine on Wednesday morning, which destroyed Mr Strickland's block containing Titcomb's jewelry store, Hughes' bookstore, Curtis & Perkins' apothecary s'ore, and Morau's clothing store. The loss was estimated at about \$30,000, about half of which is covered by insurance. The telegraph office, and several lawyers' offices, were also burnt.

From the Baltimore Sun.

Church Excitement-The Mechanics' Fair-Address of Levi Woodbury-Gen. Scott-Secretary Crawford, Army Movements &c.

NEW YORK, Oct. 12, 9 o'clock, A. M. The alleged mismanagement of the fiscal affairs of St. Peter's Catholic Church, has induced Bishop Hughes to interpose, and last Sunday he -visited the church, and at the hour appointed for afternoon service he poured out a torrent of indignant scathing eloquence upon the clergy and trustees. He declared his determination to take their temporal as well as spiritual affairs into his own hands, and informed the congregation that in future they were to consider him as their pastor. He would do his The Riots-Deplorable Results-Movements duty, though he regretted to say that St. Peter's

was the only church that had deserted him. Ail persons except owners of pews were then desired to retire, and a meeting ensued, the proceedings of which have not transpired.

The Vice President visited the fair yesterday, and subsequently listened to the anniversary address by the Hon. Levi Woodbury, at the Tabernacle.

The Hon. Geo. W Crawford Secretary of Wat, accompanied by Major General Scott, left town at 7 o'clock yesterday morning, for West Point, to inspect the military works at that place. It is his intention to return and devote to-day and to-morrow to visiting the several military posts in this vicinity. He stops at the Irving House.

I learn that General Garland, who has been stationed here. In connection with the recruiting service, has been ordered to join his brigade at San Aptonio, Texas,

But with regard to the schemes of arrangement thrown out apparently as feelers, there does not appear any insurmountable difficulty in the way of a final pacification upon the basis of a complete union with Austria, Hongary retaining her old institutions

THE RUSSIAN EMPIRE.

The Emperor of Russia has returned to St. Petersburg, and his troops are gradually withdrawing within the Russian frontiers.

Ohio Election-The Result, &c.

Columnus, Ohio, October 12. Sufficient returns have now been received to deermine the complexion of the Legislature The whigs have a majority in the Senate. In the

House the whigs have 31 and the democrats 34. In Hamilton county the democrats have a maority. There is however much excitement in regard to the making out of the returns from this county, and it is said that the matter will come up before the Legislature.

Another Riot -- The Weather--- Health of the

A serious riot occurred on Tuesday evening, between the officers and crews of the steamers Herold and Amely. The mute of the former, and several others, were badly and dangerously wounded. The weather here is cool and pleasant, and the accounts from the interior represent that much interest is being felt in favor of the Pacific railroad convention, which will be largely attended. There are now no deaths to record from cholera

for the past week, the first time since January .--The entire interments for the week are 59, including 26 children ander five years. The cholera is still lingering along the towns on the Mississippi.

From the Phil. Ledger of Thursday. of the Military-The Killed and Wounded. We resume the details of the riots from the point at which our account of yesterday broke off.

The rioters ascertaining that the military force had retired recommenced their lawless acts, and by daylight the disturbance was raging furiously. Some of the rioters jumped the fence above the California House, and set fire to the frame building in the rear of the open space, between it and the dwellings above. The colored population residing in the vicinity commenced moving, when even the females were pelted with stones by the rioters while carrying off articles of furniture. The flames spreading in the meanwhile, brought the firemen again to the spot. They sallied down the street, and the rioters retreating before them, the Phænix was put in service. In a short time however, the rioters returned and let fly a volley of bricks, with discharges of fire arms, and the members of the Phœnix were forced to fly from their carriage. The firemen, however, were reinforced by citizens, and returning again to 66 bbls. Pitch, 285 bbls. Rosin. the fire, the Good-Will and Phoenix were put into service, and preventing the further spread of the fire, which at this time had communicated to a row G. W. Davis, with 300 bbls. Spirits Turpentine, 1,500 of court houses, running west from Sixth st., the bbls. Rosin. "Schr. E. S. Powell, Powell, for N. York, by G. roofs of which were all damaged.

roofs of which were all damaged. The Robert Morris Hose Company had laid their hose for the purpose of assisting in extinguishing the fire, when the members were beaten off the car-the f riage, and it was taken possession of by the rioters,

sumals by the rioters, no disturbance occurred last evening. In visiting the scene of the late distur-bance, we found the streets in the vicinity complete-ly deserted, the rain having had the effect of driving-AVAL STORES the rioters as well as the spectators to their homes. Mc Shane died at the hospital last evening about dark. This makes the third fatal case, He had arrived in this country but a few weeks since, and was making preparations to return, intending to start

the last of this week. Arrests for Rioting .- During Tuesday, night 'and vesterday, 30 men and boys, black and white, were arrested and committed to the city lock up, on the charge of having peen engaged in the riots. Five of them were subsequently charged. These in custody will have a hearing to-day or to-morrow, The outbreak was one of those sudden explosions of brutal passions, which could not have been foreseen, and owing to the employment of the police RICE. on duties incident to the election, could not be guarded against. Still the public authorities of the county are justly anmerable for allowing a lawless gang of ruffians to gain, by impunity for former frequent outrages, the audacity that showed itself in the resistance which they made to the laws on Tuesday night. The rioters have been guilty of the highest crimes known to the laws-arsop and murderand we suggest whether it is not the duty of the Governor to immediately offer a reward for the ar- PEAS.

to have had a hand in these dreadful outrages.

語 PORT OF WILMINGTON, OCTOBER 16.

ance of the work. The President and Board of Di-

rectors of the Cape Fear & Deep River Navigation

Company have, this day, by Resolution, directed that

Will be received, at their office in Pittsborough, Chatham County, North Carolina, until the 14th of November next, for the construction of twelve Dams over the Cape Fear River and thirteen Locks including one guard Lock; also for the excavation necessary for deepening and widening half a mile of old canal at the Bockhorn Falls. These Dams will vary in length from 400 ft. to 700 ft. They are invariably located upon ledges of rock making entirely across the river, and as the depth upon those ledges is about 1 foot, no Coffer Dams will be required .-They will be constructed of timber hewed to a square of 12 inches, laid in parallel lines, connected by cross ties running at right angles, and forming Cribs which are to be well hand-packed with stone .-The foundations being rock. the dams will be verti cal on their down stream face, with a long up stream slope, cut off at such a distance from the overfall, as to leave the vertical face at the toe of the dam, on the up stream side, about one fourth the height of the dam. Along this up stream face, there will be a double course of vertical sheet plling, and above this, and resting to some extent upon the sheeting of the dam, there will be placed a heavy bed of gravel .--The whole of the framing will be secured by dovetailed joints, boits and treenails at the crossing of the timbers. The Locks will be a modification of those genersily known as the "Composite;" the walls will be formed of alternate range timbers 12 by 12 inches, connected by cross ties-similar to the dams-and the cribs well packed with stone. There will be a double course of sound planking, with water joints to the Lock Chamber. The whole framing will be firmly bound together by dovetailed points, bolts and treenails -as in the dams. The Lock Chamber will be 18 ft. in width and 100 ft. between the gates. The timber and immer has been contracted for an' is now being delivered at the sizes for the different works. The Proposals will therefore be made for the workmanship and construction of the Dams and Locks (only) and for the stone packing, which is to be found in abundance at the sites of the different works. The Coffer Dams necessary for putting in the Locks, nicd not be included in the bids, as those will be put up by the Navigation Company ; but the Pumps must be furnished and worked by ilus con tractor.

City. Sr. Louis, October 12.

Dreadful Tornado in Cape May.

The most destructive whirlwind that has occurred in New Jersey since the memorable tornado at New Brunswick, many years ago, appears to have ewept over the upper part of Cape May County about 5 o'clock on Thursday morning last. A letter from Dennisville, some 7 miles from Delaware Bay, to the State Gazette, says It first struck a new two-story house belonging to Willis Godfrey, which was torn from its foundations and dashed to pieces. Mrs. G. and two children miraculously escaping :

"A few rods further, it came in contact with a new story and a half house, in which were the wife of Jones Corson, lately married, and her sister, both in bed. Everything is swept clean where this house stood ; it was entirely demolished. Mrs. Corson was found dead in the limbs of an old oak tree that was blown down some 40 yards from the site of the house. But little hopes are entained of the recovery of her sister, who was terribly mutilated.

"From this point it passed onward, carrying fences, trans, dec., before it had a breadth of 40 yards, a quarter of a mile further, where it encountered a large two story house, in which were the widow of Daniel Young, her daughter and three others. The house met no better fate than these above mentioned, yet strange to say, the lamates received but slight inju-

"At the end of another quarter of a mile, it struck a large barn, and what it did not take off entirely, it scattered in every direction. From this point it upset some small buildings, and threw others off the blocks, until it reached Great Egg Harbor Bay, near Beesley's Point, no doubt making a magnificent water spout is its passage over the water. A part of a roof was found on the point of Peck's beach. four miles from the scene of disaster, and a that six miles off. A scythe without a snath, was carried three-fourths of a mile."

FROM HAYTI.

Late accounts from Port-au-Prince represent that the Island, generally, remained tranquil and undia. turbed. The Emperor had established two orders of knighthood for the newly-created nobles of his empire. The first is the Imperial Order of St. Faustin, and the other the Military Order of the Legion of Honor. A throne and two crowns (one for the Emperor and the other for the Empress) have been sent for to Paris, accompanied with directions that they shall not be inferior to the most costly diadems now worn by the most renowned monarchs of Europe.

FRENCH WEST INDIES.

The Jamaica Despatch of the 2d instant has the following :

At Guadaloupe the public peace had been disturbed to an slarming degree by the factions of Schenicherists and Bissettists, [who are opposing candida tee for the Assembly,] who, with fire and weapons has yet been, arranged with regard to Hungary .--

aristocratic frippery, and surrounded by pomp and ONE WEEK LATER FROM EUROPE.

The steamship Caledonia arrived at Boston at a quarter past seven o'clock on the morning of Oct. 12

The commercial advices are unimportant. The cotton market had been very quiet, both 'consumers and speculators acting with great caution; and although a fair amount of business had been transacted, prices suffered a decline,

The grain trade has again become dull. There is only a limited business going forward, and prices have rather a downward tendency. The holders of Indian Corn, afloat, in Liverpdool, have become more firm in their demands; as yet, no orders from Ireland have warranted their increased protection. The reports from the manufacturing districts still represent the state of trade therein as being languid, without any immediate prospect of improvement, particularly as the recent advices from India are not favorable for extensive shipments of goods to that

quarter. The mortality from cholera has further declined. The deaths from all causes in the London districts, for the week ending the 22d, were 3,160, 2,842 and 1,961; thus, the cholera deaths decreased from 2,026 and 1,682 to 839 in the same period. The deaths from cholers, which were at the beginning of the month 400 daily, fell on the 19th to 110, and declined on the 20th to 102, and on the 27th, a further satisfactory decline appeared, showing the much greater diminution to 79 for all London; 331 for all Enland, and 57 for Scotland. The cases of diarrhoes being 174. This is the most satisfactory return which has appeared since the first outbreak of the disorder. In Liverpool, the disappearance of the discase has been equally signal.

FRANCE.

France now enjoys a perfect tranquility, and there is no prospect at present of another pelitical agitation. Indeed public opinion is apparently becoming more and more averse to revolutions in proportion as the increase of trade and commerce exhibits the advantages of internal tranquility. Mr. Rives, who succeeds Mr. Rush as Minister of the United States to the French Republic, has arrived in Paris.

AUSTRIA AND HUNGARY.

Nothing has transpired in relation to the resolution of the Porte not to yield the Hungarian Refugees to the demands of Austria and Russia, except that a Russian officer of high rank has arrived at Constantinople to demand their extradition. There is no doubt that the chief leaders are still at Widden, in Wallschin, and the probability is, that as soon as the requisite facilities can be furnished to get them out of the Turkish dominions, that they will be allowed to go where they please.

The latest intelligence from Vienna extends to the 22d instant, inclusively, at which date Comorn had not surrendered, and nothing of any importance eppears to have occurred around that fortress. It was, however, reported that the Hungarians had made a sally on the 13th, and obtained some elight advantage over the imperial troops, and had captured some scaling ladders. The terms proposed by two deputies, who were sent by the garrison to Acs, were understood to have been rejected. Nothing definite

who ran off the hose, (which was cut by them,) and then carried off the apparatus into Moyamensing.-It was afterwards restored to the company by John Knesss and some other watchmen of that district -The hose of the Dilligent Fire Company was hacked with knives so as to be useless. The State House bell again gave the signal for the assemblage of the military. At this time Sixth street, from Walnut to Lombard streets, was thronged with people to see what was going on, and from Lombard to South the battle of bricks and buckshot was going on, with occasional intermissions. By half past eight o'clock the the tumult had ceased, the rioters having nearly all dispersed, and those remaining could not be distinguished from the spectators with whom they were mingled. Saveral persons were wounded in the af-

fray, of whom the following were admitted into the Hospital. James Beasley, a member of the Perseverance Hose Company, received a ball in his breast. He was conveyed to the Hospital, where he remains in

Broad and Arch streets. Lawrence McShane, while looking out of the win-

fow of a house in which his sister lived, was struck in the temple with a chance shot, and received a severe wound which will propably prove fatal.

A young medical student received a ball in his high while looking on the affray.

The following colored men were also taken to the Hospital : R. Kandall, badly hurt, shot in the back of his head ; Chas. Anderson, stabbed in the thigh, and Geo. Tillotson, stabbed in the breast.

A colored boy, in the employ of Sheriff Lelar, had bree shots extracted from his leg, which were received while passing Sixth and Lombard streets. A young man, the son of Capt. Walker, the keeper of a tavern in Seventh, below South, was wounded duing Tuesday night. A marble fired from a musket struck a rib, and glancing, inflicted a severe flesh wound. The marble was extracted by Mr. Rizer.

The following is the verdict of the coroners' inuest upon the body of Charles Himmelwright :--I'hat Charles Himmelwright came to his death by wound in his breast inflicted by a musket ball, which perforated the heart at the junction of the main artery-the weapon being in the hands of some person unknown to the jury, on the night of the 9th of October, while the deceased was in the discharge of his duties as fireman, during the riot at Sizeh and St. Mary streets."

The coroner also held an inquest upon the body of John Griffith, the colored boy, mentioned yesterday as having died at the Hospital from the wound in the head, inflicted by a musket ball. The following is the verdict of the jury : "That John Griffith came to his death from a wound in his head by a ball from a musket, fired in the hands of some person unknown to the jury, on the night of the 9th of October, during the riots at the corner of Sixth und St. Mary streets."

Cornelius Speel, one of the election judges in Sixth Ward, Southwark, was struck on the forehead with a spent ball. The injury was not serious.

The colored church in Lombard st. below 6th, and the old church edifice at Fifth and Gaskill sts., have been converted into barracks for the use of the mili-

Wool,	-12 "

NEW YORK MARKET.

Oct. 13. Sales of 600 bales Cotton, at full prices 9] a 12. Flour heavy and no sales at lower rates. -Nothing doing in Corn, Wheat or Ryc.

Naval Stores-Rough Turpentine remains without change, \$2.621 a 2.681 per bbl. of 280 lbs. Spirits of Turpentine, with a good demand, is firm at -33 ets. No. 1. Rosin in demand-sales, \$4.12 a 4.15; Common Rosin scarce, and brings \$1.81 in yard, and \$1.37 delivered. Tar remains without alteration. Rice-Market heavy and unsettled--sales 900

tierces at \$3, a 3.50 per hundred pounds. Preights-with a little more offering, are improving; still they are too low to pay the owners.

FAYETTEVILLE MARKET.

Oct. 13. The North Carolinian says : "Considetable alteration has taken place in prices this week. Cotton has advanced a quarter-corn fallen to 50flavaeed advanced to 1,25-dc. A fair amount of business done during the week. The river still low, but a prospect of a rise."

Bacon, 51 a 61. Cottón, 91 a 101. Corn, 45 a 50. Flour 04,75 a \$5,00. Lard, 7 a 8.

THE MARKETS PER CALEDONIA. LIVERFOOL COTTON MARKET, Sept. 28.-We have again to report a quiet cotton market. During the past week prices of American are without change; but at the same remark that it has been difficult eith er to buy or sell on satisfactory terms. This continued duliness is not attributed to any change in the accounts received of the growing crop, which are still unfavorable, but to the discouraging state of the Manchester market, which as yet exhibits no signs of improvement. The import for this week is only 322 bales of all sorts. The large sales of Surate are to be attributed to the unfavorable reports of the crops in the East, but we cannot quote any advance. 8,350 American, 4,500 Surat, and 350 Egyptian have been taken on speculation, 2,200

The Proposals will be 1st. For the framing and construction of the

2d. For all Stone Packing, per cubic yard, 3d. For all Mork Excernsion in foundation, per ubic yard, \$

For the Workanship of all Plank, per 1,000 4th board measurement. 8

Sth. For all Iron Bolts and Straps, per pound. 8 6th For all Spikes and Nails, per hundred, including driving, \$

7th. For all White Oak Treenails 16 by 2 inches. per hundred, 8

8th. For all Mitre Sills and Hollow Quoin Pests, including Framing and Securing in their proper position, per linear foot, \$ The Gates will be made under a separate contract

Plans of the above work will be exhibited, and specifications for the same delivered to the Contractors, at the office of the Engineer of the Company, in Pittaborough, at any time when salled for. After the recript of the Proposals, time will be taken for the consideration of the same, until the 17th of the same month, on which day, in case the Proposals should be found satisfactory, the several works will be declared off. This work will be paid for in current bank notes. In addition to the usual reservation of 20 per cent. on the monthly estimates, the Contractors will be required to give ample security satisfactory to the Board of Directors, for the completion of the work at the time, and in the manner required by the specifications. For the information of those wishing to visit the work, they are informed that they can travel by Rail Road and Steam Boat to within 30 miles of the line of improvement. It is believed that no work can offer greater inducements to the Contractor than this. The health of the country, the abundance of provisions, of all kinds-and the facility with which slave labor can be obtained-(and this will constitute the chief force) together with the probable extension of the work, for some 200 miles beyond its present terminus, all combine to render a position upon this work, to an enterprising Contractor, desirable.

W BEVERHOUT THOMPSON. Chief Engineer C. F. & D. R. Nav. Co. Pitreborough. 16, 1949. 90-131,
