THE WILL OF PETER THE GREAT

A London paper, in connection with the present troubled state of Europe, and the part that Russia is openly and secretly taking, republishes this curious document.

Trinity, we, Peter the great, unto all our decendants and successors to the throne and Government of the Russian nation.

The All-Powerful, from whom we hold our life and our Throne, after having revealed unto us his wishes and intentions, and after being our support, permits us to look upon Russia as called upon to establish her rule over all Europe. This idea is based upon the fact that all the nations of this portion of the globe are fast approaching to a state of utter decrepitude.

From this it results that they can be easily conquered by a new race of people, when it has attained full power and strength. We look upon our invasion of the West and East as a decree of Divine Providence, which has already once regenerated the Roman Empire by an invasion of barba-

The emigration of men from the north is like the inundation of the Nile, which at certain seasons enriches with its waters the arid plains of Egypt. We found Russia a small rivulet, we leave it an immense river; our successors will make of it an ocean, destined to fertilize the whole of Europe, if they know how to guide its waves. We leave them then the following instructions, which we earnestly recommend to their con-

stant meditation :-1. To keep the Russian nation in constant warfare in order always to have good soldiers. Peace must only be permitted to remit the finances. To recruit the army, choose the moment favorable for attack. Thus peace will advance your projects of war, and war those of peace, for obtaining the enlargement and prosperity of Russia.

2. Draw unto you by all possible means from the civilized nations of Europe-captains during war, and learned men during peace, so that Russia may benefit by the advantages of other nations.

3. Take care to mix in the affairs of all Europe; and in particular of Germany, which, being the nearest nation to you, deserves your chief attention.

4. Divide Poland by rasing up continual adapted to the wants of the town and country disorders and jealousies within its bosom. within their countries.

5. Take all you can from Sweden; and to effect this, isolate her from Denmark, and vice versa. Be careful to rouse their jealousy.

6. Marry Russian Princes with German Princesses; multiply these family alliances; unite your interest; and, by the increase of our influence, attach Germany to our cause.

account of our commere as being the country most useful for the development of our navy (merchants, &c.,) and tor the exchange of our produce against her gold ; keep up continued communications with her merchants and sailors, so that ours may acquire experience in commerce and navigation.

8. Constantly extend yourselves along the shores of the Baltic and the borders of Euxine.

9. Do all in your power to approach closely Constantinople and India. Remember that he who rules over these countries is the real Sovereign of the world.

Keep up continued wars with Turkey and with Persia Establish dockyards in the Black Sea. Gradually obtain the command of this sea, as well as of the Baltic This is necessary for the entire success of our projects. Hasten the fall of Persia .-Open for yourselves a route towards the Persian Gulf. Re-establish, as much as posible, by means of Syria, the ancient com merce of the Levant, and thus advance towards India. Once there, you will not

require English gold. 10. Carefully seek the alliance of Austria. Make her believe that you will second her in her projects for dominion over Germany, and secretly stir up the jealously of other Princes against her, and manage so that each he disposed to claim the assistance of Russia; and exercise over each a sort of protection which will lead the way to future dominion over them.

11. Make Austria drive the Turks out of Europe, and neutralize her jealousy by offering to her a portion of your conquests, which you will further on take back.

Hui gary and Poland; become their centre and support, as universal dominion over them, by a kind of Sacredotal rule (autoeratic sacerdotale,) by this you will have many friends amongst your enemies.

13 Sweden dismembered, Persia conquered, Poland subjugated, Turkey beaten. our armies united, the Black and Baltic Seas guarded by our vessels, prepare seper

ately and secretly, first the Court of Versailles, then that of Vieuna, to share the empire of the universe with Russia. It one accept, flatter her ambition and amourpropre, and make use of one to crush the other by engaging them in war. The result cannot be doubtful Russia will be possessed of the whole of the East, and of

a great portion of Europe. 14. If, which is not probable, both should refuse the offer of Russia, raise a quarrel between them, and one which will ruin them both. Then Russia profiting by this decisive in ment, will inundate Germany with the troop which she will have assembled beforehand. At the same time two fleets full of soldiers will have the Baltic and the Black Sea-will advance along the Mediteranean and the ocean, keeping France in check with one, and Germany with the other. And these two countries conquered, the remainder of Eu-In the name of most holy and indivisible rope will fall under our yoke ! Thus can Europe be subjugated !
