"Bridge Too Far"

Continued From Page 8

merely doing "cameo roles" to support the action sequences. Some resemblance to another war film "The Great Escape" could be attributed to director Richard Attenborough, who played "Big X" in that one.

The movie is entertaining and well-placed in spite of its great length. The director even managed to include a bit of symbolism in an otherwise uncomplicated plot: British planes had just dropped badly-needed supplies in a field guarded by German snipers. One desperate British soldier ran out on to the field, grabbed the package, and died trying to retrieve it for his unit. The package contained hats--not food or ammunition--HATS. A neat observation on the futility of war.

Our final reaction to the film was: there weren't any blacks in the entire 3 and a half hour film. People watching war films could easily assume that these weren't any blacks in that war--but there were. Even in the British Army. Somebody should have told Attenborough.

Just Good Automobiles
