"THE FUN CAPITOL OF THE TRIAD—CHECK IT OUT!"

YOU AND THE STARS

by Sylvia Hairston

ARIES—March 21-April 20
You may be bubbling with excitement at this time, making plans for new and major alterations. You perform unpleasant tasks easily as you feel that you'll be compensated with gain in the near future. You get a feeling of freedom as this cycle closes as you are likely to be in new surroundings. A busy period now, with the chance to make new and good friends. For single Arians, love is the big thing and special dreams could come true.

TAURUS—April 21-May 21
If you are one of the lucky ones who are vacationing during this period, you will find that walking and the serenity of parks and beaches will do wonders for your desire to escape from routine duties. Although you may not be able to escape entirely thoughts of future demands, try not to let this spoil your holiday. Do not force issues with loved ones now. The entrance of your sign ruler in the home sector helps you solve problems concerning domestic issues.

GEMINI—May 21-June 20
Discussions with others or people concerned with your future can be important to your plans. Get ready for the busy period early fall will usher in. You are in a once in a decade positive period to reach out and shape your life into what you desire it to be. The end of this period is an especially "up" cycle for Geminians, so go, go, go! You belong to a sign whose natives are gifted in many areas; one of your most cherished wishes shows every indication of becoming a reality.

CANCER—June 21-July 22
This period is the end of what should have been a constructive if not overly exciting period as well as a preview of the success you can look forward to in the near future, when one of your main wishes looks very promising, especially if it concerns love or money. You may tend at this time to worry unnecessarily over trifles and become picky and grouchy, especially with your partners or life-mate. Indications are that you will have excellent financial progress, starting with your next cycle, and you reap rewards of your careful planning.

LEO—July 23-August 22
You feel that life smiles on you during this cycle when the Sun shines on your sector of finances giving you a real opportunity for real earnings. You have fleeting chances to expand in many ways now. You should see a definite improvement which will make the difference in adequate income and real assets. The end of this period will usher in some important days; especially watch the 26th. The Full Moon period of the 28th may bring strange revelations about the feelings of others. Give special attention to group affiliations.

HAPPY BIRTHDAY VIRGO! August 23-September 22
People born during this period are fastidious and discriminating... extremely fond of harmony in their surroundings... have excellent taste... and, perhaps because of their trait for being critical, make good lawyers and debaters. They usually succeed in their business ventures by their steady and industrious persistency, and materialistic views. During this period, the Sun (having entered your sign on the 23rd) causes doors to begin opening up to you, and you can expect relief from some former plight. Don't jump into any immediate new plans just yet. With fool-proof ideas that all will go through, work steadily towards your goal; think great thoughts, then watch for the next cycle when you can come out into the open as new horizons open to you.

LIBRA—September 23-October 22
Summer vacation's over and social activity left you feeling a little depleted. This is a

good period for a rest. Slow down in all ways and watch your diet. Your energy level dips now but don't let this depress you. This is a way of getting physical and psychological rest. You are able to get closer to loved ones during this period. Be cool and conscientious at work, avoiding trouble-chasers. Your weekend should be enjoyable.

SCORPIO—October 23-November 22
The Sun moves into your sector of friends and social activity during this period. Some pleasant surprises are in store for you in this area. This is a good time to re-establish ties with neglected friendships. Romantic life is also highlighted. Your faith in loved ones is strong. Talking things over with them will be rewarding. Many Scorpios will travel during this period. Perhaps for business more than pleasure as the money planet is now transiting this sector of your chart. Your thoughts turn to business and finances now as the summer months may have put a strain on your budget. Business goes well now.

SAGITTARIUS—November 23-December 21
During this period your planetary ruler moves into the sector of your chart dealing with taxes, legacies and your partner's finances. Any of these areas can benefit you. You should also begin to make more progress in your career or working life, as some problems in this area begin to disappear. You may be tired from the activity in this connection, but will keep going on. Make sure that you

look after your health, especially where food and drink are concerned. Breaking routine at the end of this period and taking off into the country will be the best medicine.

CAPRICORN—December 22-January 19
Spiritual evaluation will be the focus of your inner attention or feelings now. Your mind will be less occupied with the material side of life and more attention given to the religious. You might develop a serious and philosophical interest in the occult and fundamentalist energy studies. Your marriage sector is under favorable rays now, featuring expansion in the togetherness realm of your personal life. This is a fine marriage and partnership period. Some family member might put a fly in the ointment. Your new found spiritual guidance will help you now.

AQUARIUS—January 20-February 18
The Moon in your sign during this period will give you an uplift in spirit. You will be able to communicate and enjoy a more sociable atmosphere. Your extra work load now is more toward creative expression; you'll do a good job which could lead to future opportunity. Some of your wishes could come

true now. Career development is especially promising. Let obstinacy pay no part in your plans; your best instincts will insure future success. Avoid high-strung and nervous people if possible. You need to protect your emotions.

PISCES—February 19-March 20

You will receive encouragement for good ideas that you formulate during this period, which will greatly help to lift you out of the doldrums. You have the opportunity to carry out your ideas. You are supercreative now. Perhaps love is the inspiration that is prompting many Piceans as two opposite dynamic planets, Venus and Mars, activate your sector of romance and speculation during this exceptionally fortunate cycle. Your most desired wishes may be realized.

Prayer Poem

A famous hymn writer of 100 years ago has summed up the thought here in the familiar & inspiring words.

*"Go forward, Christian soldier,
Nor dream of peaceful rest,
Till Satan's host is vanquished
And heaven is all possessed
Till Christ himself shall call thee
To lay thine armor by,
And wear in endless glory
The crown of victory."*

"Our weekdays have no sorrows the sabbath cannot heal." Worship in church this week.
