YOU AND THE STARS

by Sylvia Hairston

September 7-14

The following "Astro-Profile" is a special feature of "You And The Stars" which will provide an in-depth look at the lives of famous blacks and the aspect of the stars during important points in their lives.

ASTRO-PROFILE of Alex Haley—Continued from last week

Another interesting point to note in this chart is the impact that Mr. Haley's "Roots" is having on the literary and educational system. (Courses in a number of colleges have stemmed from this book.)

In the sector of this chart that deals with creativity, expansive Jupiter has rulership, as this area is under the domain of the sign Sagittarius which is ruled by Jupiter. This astrological aspect certainly helped in expanding the scope of his work. Nor should we overlook the planet Uranus, which relates to public recognition and is in the sector that deals with money and the finances of others. To top all of this, on the evening that "Roots" was televised, the Moon was in the sign of Pisces, the sign said to rule the black race. As millions viewed this film, a part of black history was revealed to many for the first time. Perhaps the dramatization of Alex Haley's "roots" will prompt those who are in ignorance of the past to view the future from a different perspective. Perhaps their self-concept will be less obvious and perhaps they will be inspired to search for their "roots" and to respect the "roots" of others—especially the long overlooked "roots" of Black America.

ARIES—March 21-April 20 You may be feeling a little anxious during this period because a matter is not progressing as fast as you would like. This could be personal or a business venture. Resist high-flying ideas of your own "self" and things will fall into place. Your work benefits now from good vibrations from the Sun. Now is the time to get domestic life in order. If the chance comes up where an unexpected trip is in the offing, it will do you a world of good. However, you may not want to stay away too long, as your interests are based close to home now.

TAURUS—April 21-May 20 Don't get involved in problems of others through what you may think of as your sense of duty. There is an undercurrent of bad feelings or conflict in some areas involving others now. You may change your mind or plans about a relationship that seems to be an "on and off" affair with romantic overtones. This period may prompt you to consider facts in a heart versus head manner. The new Moon may cause you to look for greener pastures where love matters are concerned—which are very much a part of your life now.

GEMINI—May 21-June 20 Your mate or close associate may need your help and support during this period. Be sure to give it. Don't feel that what you are doing is more important than what he or she does.

CAPRICORN—December 22-January 19 You begin to feel relieved from your worries regarding business matters. Your mate or partner's ideas can be the source of making headway in the material world. This is definitely a period for mutual expansion. All planetary action points to cooperation and working with others. You are in a cycle when you are more receptive to others. They, in turn, will be of much help to you professionally and personally.

AQUARIUS—January 20-February 18 Your good spirits may be the result of the recent improvement in your financial status.

drobe will go a long way toward making you feel better psychologically. A peaceful month, with serenity flowing in almost all areas.

LEO—July 23-August 22 Take care of all emergencies concerning work now. Business needs could take you a long way toward establishing a more secure future. Get rid of any feeling of inferiority that may hamper your success. Take some time out for recreation as "all work and no play can lead to a dull Leo." There should be few problems of interpersonal nature now. The feeling that you have been dutiful makes you happy and improves your stature of dignity.

HAPPY BIRTHDAY, VIRGO

Any new undertakings should be postponed until mid-month as that period of the month is more promising for pushing ahead. What you are, and it's one of Virgo's greatest traits, is adaptable. Virgo, although not as breezy and flamboyant as Gemini—nor as expansive and easy-going as Sagittarius—is the third, including those two signs, of the mutable signs. Virgo's adaptability often lands them right on top since they can adapt themselves to almost any pursuit in life.

During this period, in accordance with the foregoing advice, Virgoans should strive to uphold professional standards. Your perfectionism is bound to please, and in the right places, the right person.

LIBRA—September 23-October 22 The new Moon's occurrence during this period helps you to think more clearly. New interests replace old. You will find that others are more in accordance with your ideas and views. Avoid any self-centeredness that may injure the feelings of a loved one. Don't hesitate to give comfort where it is needed. Important professional advances can come your way now as the Sun advances towards your solar sector of personality. You will then wake up and feel like your old self again.

SCORPIO—October 23-November 22 September sees you getting some of your wishes, dreams and hopes in better perspective. Your faculties have recently gone through a period of testing, but Scorpios are known for their strong minds and beliefs. The focus now is on how you handle personal relationships. Single Scorpios have good prospects now for romance, while married folk of this sign should see signs of improvement.

SAGITTARIUS—November 23-December 21 This is the time of greatest progress for you. Find conservative ways of insuring your future. You may be able to turn dormant situations into advantage by exploring potentials. Slow down. You may be in too much of a rush to organize and gather your thoughts. Follow inspirational leads concerning your finances and how to build up that nest egg about which you've been thinking. This period sees you traveling or communicating.

CAPRICORN—December 22-January 19 You begin to feel relieved from your worries regarding business matters. Your mate or partner's ideas can be the source of making headway in the material world. This is definitely a period for mutual expansion. All planetary action points to cooperation and working with others. You are in a cycle when you are more receptive to others. They, in turn, will be of much help to you professionally and personally.

AQUARIUS—January 20-February 18 Your good spirits may be the result of the recent improvement in your financial status.

Your planetary ruler's a good aspect to the Moon, helps you turn on your Aquarian charm. Also, this is a fine period to pursue artistic and cultural interests. Take off your hat if circumstances allow, it only for a week-end. Romance is in the air for some of you; Venus is making you serious about that special person, and many single Aquarians will walk the wedding aisle during this harmonious cycle.

PISCES—February 19-March 20 Places of relaxation by way of the movies, on the tennis court or at dinner with friends are ways in which you may meet a romantic prospect during this period, when romance is accented and might occur in places where you would not normally expect it, as this is the peak period for amorous action for Pisceans. Jupiter sheds her benevolent rays on you now and socially everything wakes up the sector of speculation, romance and communication. Personal relationships are warmer and closer, and Venus is shooting her arrows into your marriage sector.

Apartheid

and sustain the apartheid regime. The call for solidarity with the liberation movement must always be coupled with a call for "no arms to racists" and "no profit from racism."

I have again and again stressed the need for concerted international action

against apartheid, uniting all governments and organizations irrespective of any differences they have on other matters. The elimination of apartheid in South Africa is not merely an African responsibility but the duty of all those who believe in peace and international cooperation.
