GREAT MOMENTS IN AMERICAN HISTORY

Back in 1775, American militiamen battled the British at Concord and fired what Ralph Waldo Emerson called, "the shot heard round the world."

After a running battle at Concord, the patriots laid siege to Boston, where the British had headquarters. An American expedition invaded Canada, seized Montreal and tried to capture Quebec. British plans to occupy the Carolinas met with disaster. Then, on July 4, 1776, the Second Continental Congress adopted the Declaration of Independence. It was a great moment in American history.

Other great moments were to follow in American military history. The actions of one National Guard unit, for example, are particularly remembered. That unit, the 178th Infantry of the Illinois Army National Guard, was organized as the 8th Illinois Infantry in 1895 in Chicago. The regiment, composed of Black National Guardsmen, was redesignated as the 370th Infantry in 1917. It arrived in France in April 1918, when it, along with two other Black National Guard regiments, became the only American units attached to the French Army in World War I.

On June 21, 1918, the 370th Infantry was placed on the front line. Members of the 370th received 21 Distinguished Service Crosses and 68 Croix de Guerre during that time. The gallant unit will always be remembered.

A more recent moment in American history that will be remembered is the announcement by the Army

of the formation of a new Army National Guard Mechanized Division. The new division, the 35th Infantry Division (Mechanized), will be

the ninth Army National Guard combat division, increasing the number of Army combat divisions to 25.

SEE YOUR DOCTOR

This information comes from Smith Kline and French Laboratories, a leader in high blood pressure research and therapeutics.

Medical science has identified some of the factors that increase your chances of developing heart disease. Salt is one of these risk factors. Too much salt in your diet increases the risk of high blood pressure. High blood pressure is second only to smoking as a factor that increases your risk of heart disease.

If your doctor wants you to cut down on salt, try to avoid adding salt at the table and eat natural foods instead of processed foods such as canned soups and vegetables.

See your doctor. Working with your doctor to eliminate or control coronary risk factors can help combat heart disease.
