Rep. Robin Britt to speak at luncheon

The Piedmont Triad Area Council of the American Business Women's Association will observe Sept. 22 as American Business Women's Day. Council activities will revolve around a 1 p.m. luncheon to be held at the Central YMCA in Greensboro with Congressman Robin Britt as featured speaker.

Distinguished guests who will be attending include Sylvia Jordan, national ABWA president; Patricia Hyde, national ABWA secretary-treasurer; and Jane Lammerding, national ABWA

District 1 vice president.

The observance, also the anniversary of ABWA's founding in 1949, provides a special occasion to recognize the many contributions that the nearly 48 million working women in the United States have made to the private and public business sectors.

The concept for American Business Women's Day grew out of a belief by ABWA's 1981-82 national board of directors that the United States needed a national day which would recognize the achievements of not only AB-

WA's 110,000 members, but all employed women.

A U.S. Senate and House joint resolution recognizing Sept. 22 as American Business Women's Day was passed in 1983. A proclamation by President Reagan followed in the same year.

A national, non-partisan, educational association, ABWA is dedicated to the professional, educational, cultural and social advancement of business women. Currently, the association has more than 110,000 members and 2,000 chapters throughout the United States and Puerto Rico.

KKK before he won the presidency in 1980.

In the views of many Americans disenchanted with the president's three-and-a-half years in office and obviously, the Republican Party's convention crowd, the president still maintains the ultra-conservative profile and apparent obsession for converting Democratic America into a totalitarian republic no matter who is hurt in the process.

The persons who have been hurt over the past three-and-one-half years have not been just 90 percent-plus Afro-Americans, Hispanics, women and other minorities. Instead, some 90 percent-plus of all Americans who are not in the wealthy category have been hurt in a number of ways.

Some of the most dramatic ways that the average American has been hurt include the undeniable national leadership's policies leading closer to a U.S.-U.S.S.R. nuclear war; the creation of an unprecedented, dangerous \$200 billion national deficit; creation of a false illusion of a stable economy and lowered unemployment; and the establishment of a rich-man dominated society. There is much evidence to back these analyses. One may answer the following questions and provide self-evident answers.

Who, can one suspect, will eventually pay off the huge national debt created by this administration? The bulk of U.S. minorities can't do it; too many are unemployed.

Who stands to profit from the interest paid for use of credit cards? Will it be the poor who are shut out of possibilities of shareholdings in banks which derive monies from credit card use and loans? Certainly not! The rich are destined to get richer as poor suckers use the plastic cash across the nation.

Who are the profiteers as war-preparedness gadgets are developed? The rich industrialists are, of course, the beneficiaries, as they gamble with our lives as ants.

Who benefits from leading the nation to believe that the economy is stable and unemployment is at an all-time low? Surely, the nearly 8 to 10 million

unemployed citizens do not benefit, but the illusion will benefit the rich and secure as they further enrich their status by way of unnoticed political policy changes that the average citizen accepts as justified.

Overall, it is hoped that most of these analyses are incorrect. If they are not and the present national leadership is retained for four more years, we can surely expect to see more open advances toward totalitarianism.

TOUGH NEW LAW GOES INTO EFFECT

IF YOU BREAK IT, YOU COULD GO TO COURT

The North Carolina General Assembly has enacted a tough new law that goes into effect on October 1, and we intend to use it.

This law makes it a crime to tamper with our equipment to use our services without paying for them. And the penalties are stiff.

Violators may be taken into criminal or civil court. Any person found guilty, in criminal court, of tampering with our equipment can be fined up to \$500, be jailed for 30 days, or both. The minimum fine in civil court is \$300 or three times the actual value of the services taken, whichever is greater.

The law is clear

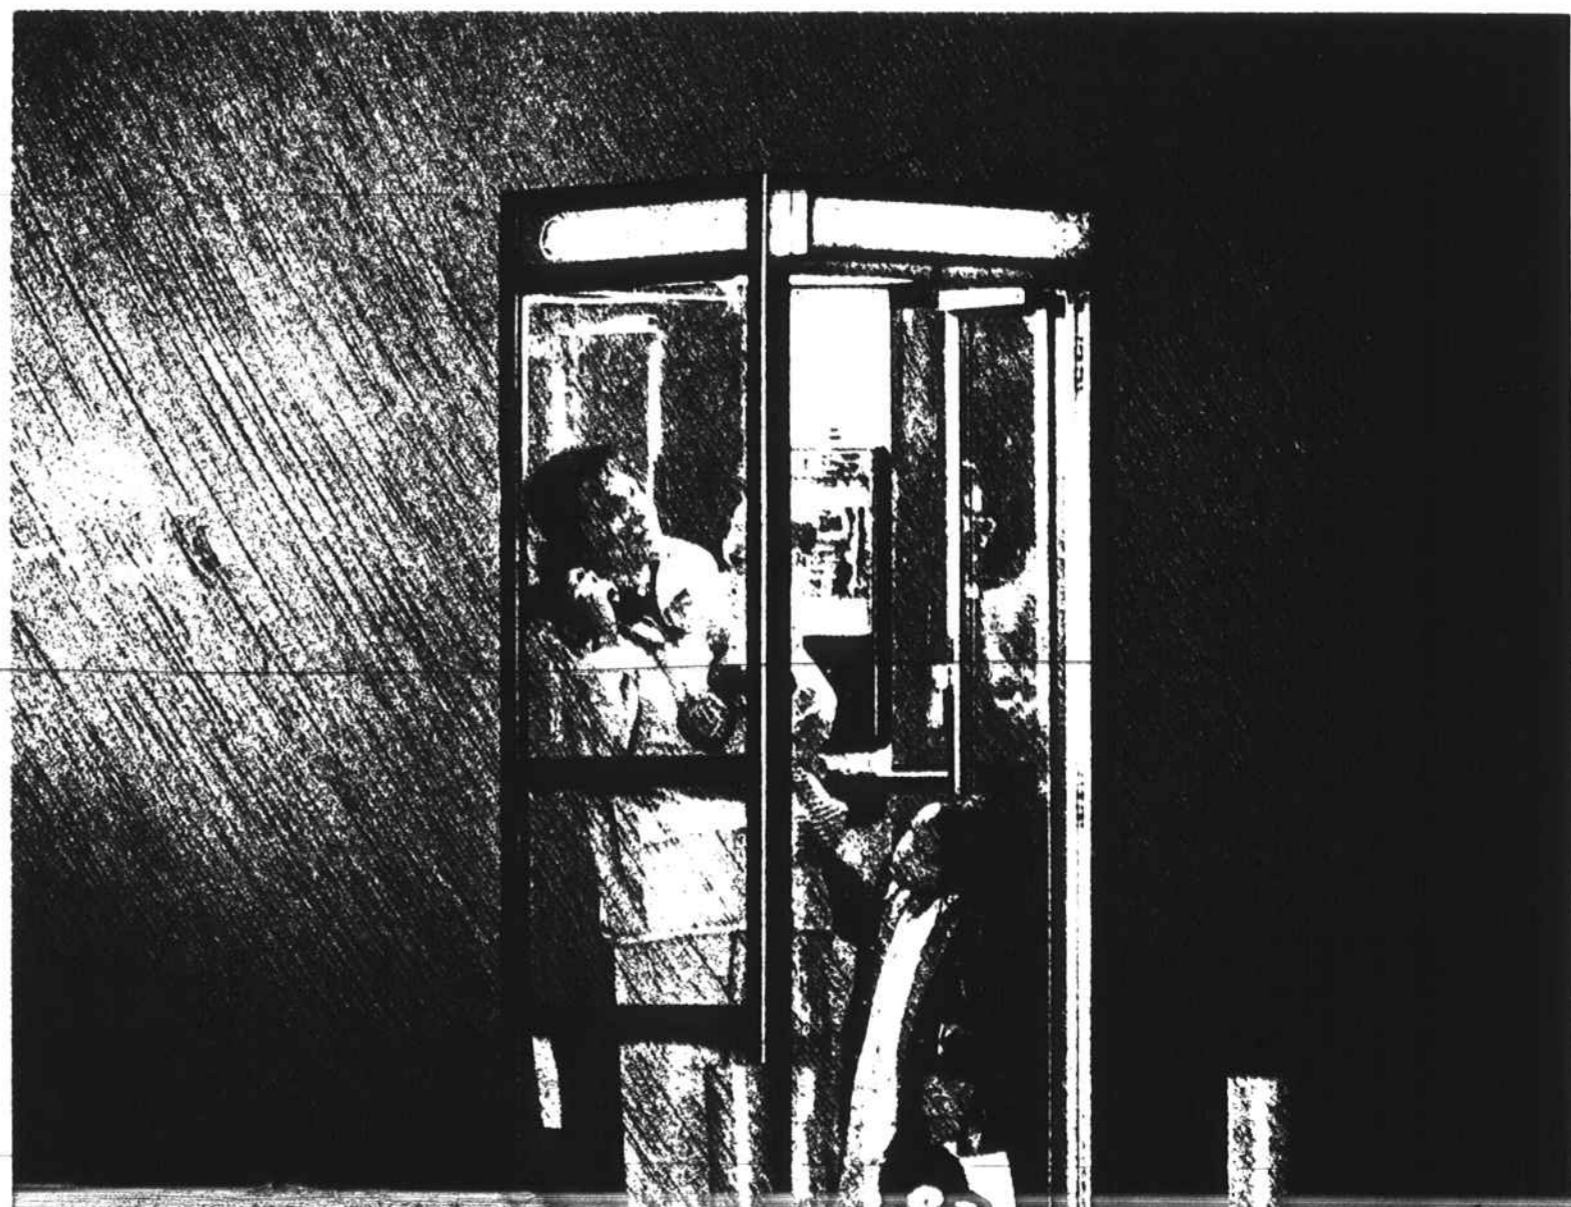

If we prove that our equipment has been tampered with or altered without our consent, the law assumes that the person receiving the services is the one who tampered with our equipment.

Don't take a chance

Our Audit Team will be checking equipment in all our service areas. If they find anything that appears to be illegal, they will report it to the proper authorities. If you are receiving any of our services without paying for them, you have until October 1 to let us know. We'll forgive and forget until then. Call the Summit Audit Team today at 723-3642.
