**Winston-Salem Symphony scouts young musicians**

The Winston-Salem Symphony is holding a statewide talent search for young musicians and vocalists in two age categories: ages 6 to 10 and ages 11 to 14.

Competitors should prepare an audition piece suitable for orchestral accompaniment.

One winner will be selected from each category to appear in the "Lollipops Concert" series Sunday, April 23, with the Winston-Salem Symphony under the direction of Maestro Peter Perret.

The symphony encourages young musicians throughout North Carolina through the Annu-

al Talent Search. It further promotes musical education through such programs as the In-school Musci Program and the "Lollipops Concert" series.

Both the preliminary auditions on Saturday, March 18, and the finals on Saturday, April, 8, will be held in the Crawford Auditorium at the North Carolina School of the Arts.

Audition pieces need not be memorized and should not exceed 10 minutes.

For more information and application forms, contact Ruth Rutte at 725-1035.

spiracies -- because it will end all human life.

"Who Killed Africa" is the title of the issue I received. "There is no question mark after the title of this article because the title is not a question. It's a declarative statement. WHO, the World Health Organization, murdered Africa with the AIDS virus. That's a provocative statement, isn't it?" he declares.

The World Health Organization "in published articles, called for scientists to work with" deadly retroviruses from domesticated animals "and attempt to make a hybrid virus that would be deadly to humans," Dr. Douglass writes.

"Why would anyone want to do this? If you destroy the T-cell system of man you destroy man. Is it even remotely possible that the World Health Organization would want to develop a virus that would wipe out the human race?"

"If their new virus creation worked; the WHO stated, then many terrible and fatal infectious viruses could be made even more terrible and more malignant. Does this strike you as being a peculiar goal for a health organization?" Dr. Douglass continues.

Research of scientific literature has proven, Dr. Douglass says, "that the National Cancer Institute in collaboration with the World Health Organization made the AIDS virus in their laboratories at Fort Detrick (now NCI). They combined the deadly retroviruses bovine leukemia virus and sheep visna virus and injected them into human tissue cultures. The result was the AIDS virus, the first human retrovirus known to man and now believed to be 100 percent fatal to those infected."

"The creation of the AIDS virus by the WHO was not just a diabolical scientific exercise that got out of hand. It was a cold-blooded successful attempt to create a killer virus which was then used in a successful experiment in Africa. So successful, in fact, that most of central Africa may be

wiped out, 75,000,000 dead within three to five years," he adds.

Based on the doubling time for the number of people infected, we are approaching World War II mortality statistics -- without a shot being fired -- and the end of the human population in Africa by the year 2000, if what he says is true.

Dr. Douglass can be, and certainly will be, called a kook. But his ideas are shared by a growing number of influential people. They reflect the research of Dr. Robert Strecker and Dr. Alan Cantwell, an AIDS researcher and author of "AIDS and the Doctors of Death."

Another source of information is Jack Carpenter (1-800-232-2292 and 213-698-0965) in Los Angeles. Ask him about "The Cancer Cure That Worked!" It might turn out that this book, based on a suppressed "pleomorphism," might hold the key for an AIDS vaccine cure.

More conspiracy to blow your mind: "A Higher Form of Killing" by Robert Harris and Jeremy Paxman. Call Jack Carpenter.

I hope that this conspiracy theory is wrong. Because if it is true, we have been betrayed by our own government and the health organizations we depend on for life. Dr. Strecker says that the U.S. population will be wiped out in 32 years.

Become informed -- read these books; view these tapes; talk to any scientific person who will listen -- and identify the real enemy, who is not some poor dying homosexual who is as much a victim as you and your family may soon become.

If the Bush administration does not investigate these charges thoroughly and satisfy a growing public anxiety, George Bush and his subalterns will be blamed for worldwide genocide.

**Don't buy a car for what it costs, but for what it's worth.**

Certainly there are cars that costs less to buy than a Mercedes-Benz. But what is ownership of those cars worth? A Mercedes-Benz owner can find value in its reliability, fit, finish, safety features and resale value. Or simply by driving it.
