

Library and Forsyth Tech select Carver School Road site

By TRACY L. PROSSER
Chronicle Staff Writer

Carver School Road may be the site for new branches of the Forsyth County Public Library and Forsyth Technical Community College.

In a meeting Tuesday, Oct. 9, between county officials and Forsyth Tech representatives, a site at the corner of Lansing Drive and Carver School Roads was discussed as a location for the facilities. County and college representatives agreed that the location was desirable for both branches, which would be financed by the county.

The City/County Planning

Board had identified the Carver School Road site as its first choice for the location of a new library branch. The board stipulated that the library be placed on the corner portion of the 16.6 acre tract for maximum visibility and accessibility.

The Forsyth County Library Board of Trustees had also established certain criteria for the branch library site in their Sept. 26 meeting. They voted unanimously that the site should contain at least three acres and must be housed in its own building. The location should be on Carver School Road, preferably on a corner lot, and it should be central

to the Carver School Road/Ogburn Station Development Guide prepared by the planning department, the board decided.

It is estimated that the library branch will cost \$1.7 million.

Forsyth Tech is also planning to build a branch to extend services offered in the main facility. The first priority for a college branch is in northeast Winston-Salem, with other branches in the future in Kernersville, Rural Hall, and Clemmons. In the meeting, Forsyth Tech also proposed the branch be constructed at the site on the corner of Lansing Drive and Carver School Road.

The college's proposal for off-campus centers said the branch would be more accessible, thus able to provide more efficiently marketable work skills. Main and West Campus facilities are already filled to capacity almost all the time, so even if people wanted to take classes, the facilities are lacking for significant expansion.

Forsyth Tech proposed to build a 25,000 square foot facility that would include 20 teaching areas. Costs for the entire college branch project are estimated to be \$3.5 million. Start-up costs would require an additional \$2 million.

The proposal listed programs that would be offered at the branch: basic skill courses, general studies courses, college transfer courses, introductory business courses, selected certificate programs, continuing education, and support services like tutoring and counseling.

East Pointe Developers, a partnership between Ernest Pitt and Tom Trollinger, has plans to construct a 43-lot residential development of moderately priced houses in the area on Carver School Road between Lansing and Viking drives.

A part of their plan included branches of the library and college on the corner of Lansing Drive and

Carver School Road. Pitt and Trollinger met with county and college representatives to present the proposal in August. A day care center is also included in the

The land would not need to be rezoned for the library, but for the college and the day care center.

Kevin Fitzgerald, assistant county manager, said Forsyth Tech would make a presentation to the board of county commissioners in the next several months. It then be up to the commission to include the project in its improvement plan.

New N.C. traffic laws in effect for headlights

What do headlights, OSHA violations and handicapped parking all have in common?

Laws affecting these and other important subjects were passed by the 1990 General Assembly and went into effect October 1.

For instance, as of October 1, North Carolina motorists must now turn their headlights whenever their windshield wipers are needed in order to make their vehicles more discernible in bad weather. The same law also requires all motor vehicles to have properly working speedometers.

On and after October 1, illegal-

ly parking in a handicapped parking space could now cost you twice as much. The fine jumps from \$25 to at least \$50 and sometimes as much as \$100 per violation.

On October 1, the maximum civil penalties for Occupational Safety and Health Act (OSHA) violations increase from \$1,000 to \$2,500 for serious violations and from \$10,000 to \$14,000 for willful violations of North Carolina's occupational safety and health laws.

The rules will tighten, too, for proprietary business and trade schools. The past session saw the passage of stronger bond and regulation requirements.

On October 1, the rules change for drug pushers, too. In addition to the changes made by the Omnibus Drug Act, another new law increases to a felony the penalty for hiring children under 18 to sell drugs.

Also as of October 1, people who make federal income tax anticipation loans will have to be registered and their fees regulated, in order to better protect taxpayers from unfair and deceptive practices.

And last but not least, food sold by churches and other religious organizations will now be exempt from state sales taxes, if the pro-

ceeds are to be used for religious activities.

Two important laws from the 1989 session take effect October 1. The solid waste bill makes it illegal to dispose of used oil in landfills after that date. And, motorists will pay \$1 more for auto inspections throughout the state and \$2.90 more for emission inspections in the counties requiring them.

The recent General Assembly passed more than 300 new laws and resolutions during its 1990 session, added to the more than 800 passed during the 1989 session. Some parts or all of 52 of these new laws go into effect October 1, 1990.

Noted journalist speaker for NAACP Awards Banquet

Kelly M. Alexander Jr., president of the North Carolina State Conference of Branches of the NAACP, has announced that the speaker for the NC NAACP's 47th Annual Awards Banquet will be Juan Williams, noted journalist, political analyst and author. Williams presently works for the Washington Post as a political analyst and writer for The Washington Post Magazine. During his career, he has covered everything from the police beat, Washington's city hall to the White House.

Mr. Williams has written articles for such publications as Fortune, The New Republic, The Atlantic Monthly, Ebony, Inside Sports, London Sunday Times, London Independent. He is best known for his award-winning book, *Eyes on the Prize—America's Civil Rights Years, 1954-1965*, which was a Book of the Month Club selection.

He appears as a panelist on Washington Week in Review on the Public Broadcasting Service; Inside Washington, a nationally syndicated public affairs program; host of Metro Week in Review, produced by WETA; scriptwriter for "No One Dies Alone", an Oprah Winfrey prime time spe-

cial. He has appeared as an invited guest on "Nightline," Crossfire," Firing Line," "Good Morning America," "Oprah," "Nightwatch," and "National Public Radio."

Williams is a frequent lecturer on topics ranging from civil rights to politics. Educated in the secondary schools of New York state, he is the holder of a Bachelor of Arts in Philosophy from Haverford College and an Honorary Doctorate of Letters from Wilmington College in Wilmington, Ohio.

He will speak on Saturday, Oct. 27, at 7 p.m. on the campus of Lenoir Rhyne College, Hickory, NC, at the 47th Annual NC NAACP Awards Dinner. That afternoon, as part of the NAACP's youth program, the PBS documentary, "Eyes on the Prize," will be shown with discussions held between segments. Tickets to the dinner are \$30 and may be obtained from the convention registration desk starting Oct. 25. Advanced purchase information may be obtained by calling (704) 376-6909 or (919) 275-0851. The PBS series discussions will be open only to those registered with the convention.

Coming in October:

HOUSEHOLD HAZARDOUS WASTE DISPOSAL DAY

FREE To All Residences of Winston-Salem and Forsyth County

WHEN: Saturday, October 13, 1990; 9 A.M. to 4:30 P.M.

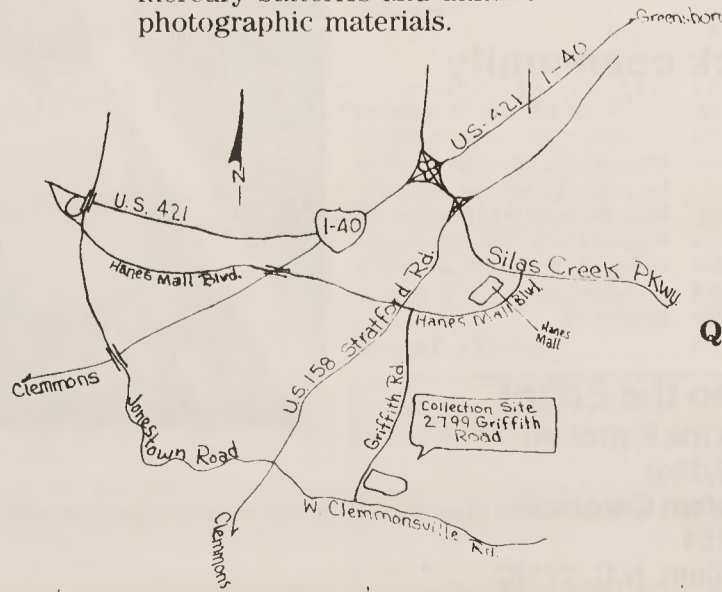

WHERE: Regional Lab & Central Maintenance Facility, 2799 Griffith Road (see map below).

WHO: For all households in the City of Winston-Salem and Forsyth County. **Wastes generated by commercial or industrial concerns will not be accepted.**

WHY: Almost all of us use chemical products in our homes that can be dangerous to us or our families if not used properly. These products become "household hazardous wastes" once they are no longer needed. They may get thrown in the daily trash, down the sink, or poured on the ground and therefore end up in our local landfill or wastewater treatment plants, in rivers, in streams, or in our ground water — NONE of which are equipped to treat or contain the properties of hazardous waste.

Our second Household Hazardous Waste Disposal Day will provide an opportunity for us to recycle, or environmentally dispose of, unwanted products from under sinks or in garages. Recyclers and contractors will be at the site to separate, package, transport, recycle and dispose of these items in an EPA approved manner.

WHAT: A household hazardous waste is a discarded household material that is poisonous, ignitable, explosive or corrosive. Products with these characteristics frequently are labeled as poison, skin and eye irritant, flammable, combustible, harmful if swallowed, etc. Examples of household wastes that can be hazardous or difficult to dispose of properly are: metal polish, oven cleaners, rug shampoos, bug sprays, rat bait, pesticides, gasoline, fuel oil, antifreeze, motor oil, brake fluid, car batteries, paints, glues, strippers, thinners, ammunition, solvents, mercury batteries and unmixed photographic materials.

HOW: Keep items separate (do not mix) and in their original containers wherever possible. If the label is unreadable or a material is in a different container, label the item. We suggest you put these items in a cardboard box lined with newspaper. Then, transport these to the disposal day site on October 13, 1990 where you will be directed to one of four unloading areas. A contractor's representative may ask questions about the items in order to help classify the items as efficiently as possible.

WHAT NOT TO BRING: Do not bring regular trash or recyclables. Dispose of trash in the usual manner. Recyclables, such as newspaper, aluminum and glass, can be brought to the Recycling Station at 1639 Silas Creek Parkway (call 723-8090 for hours of operation). Questions regarding recycling, call the Winston-Salem Beautiful, 727-8013. Do not bring radioactive materials, infectious or medical wastes.

QUESTIONS: Call Hanes Mill Road Landfill, 767-3016.

STAFF & HELPERS: City/County Utilities Division staff, Douglas Battery, Forsyth Extension Homemakers, Noble Oil, N.C. Department of Agriculture, Traffic Engineering Division staff and Winston-Salem Police Department.
