SIX YEARS OLD AND ALREADY IN LINE FOR UNEMPLOYMENT.

By the time a child is six years old, experts can tell if he's at risk to drop out of high school. They can predict who will have a hard time keeping a job. And even who is more likely to end up on welfare. Thirteen million American children live below the poverty line. And they need help before the age of six to improve their chances in life. Early intervention programs are crucial. And they do work. Programs like Success by Six have proven that a poor child who receives help early on can hope for a much brighter future. But these programs need help from people like you. People to answer the phone, do odd jobs, raise money or play with a child. Whether you give an hour of your time or a box of used toys, it can make a world of difference. Call 1-800-733-5400 to see what you can do to help in your area.
