

Quality Care Preventive Maintenance.

Six ways to help keep your car from growing old.

① Inspect brakes every 30,000 miles to help ensure safe stopping ability.

② Change your oil and oil filter every 3,000-7,500 miles (depending on your driving habits and as outlined in your owners manual) to maintain engine performance.

③ Check coolant, clamps, and hoses annually to help prevent overheating.

④ Change spark plugs every 30,000 miles to help keep the engine burning.

⑤ Wash your car regularly to help keep the environment clean.

⑥ Replace the air filter every 30,000 miles to help improve engine performance.

Your car can't take care of itself. There are things you should do to help ensure it runs properly. The first step is to see your Ford or Lincoln-Mercury Dealer and get Quality Care Preventive Maintenance. It's expert service on your car or truck performed by trained Quality Care technicians who know exactly what your car needs and when. They use only genuine Ford or Motorcraft parts. And they do it all at a competitive price. Your car is only as old as it feels. And with Quality Care Preventive Maintenance, you'll keep it feeling fine.
