

“ I have a weakened heart.
 I've never been sick in my life.
 I've always known hard work.
 I share every day with my wife of 52 years.
 My hope is for the future.
 I won't let my family down.
 I want to become strong again.
 I need the best surgeon in the world.”

Strength begins

at Forsyth Medical Center where we perform more open heart surgeries than any other medical center in the region.
