

DURING A STROKE,
EVERY MINUTE
 CAN MAKE THE
DIFFERENCE
 OF A LIFETIME.

Stroke is a brain attack. It is the nation's third leading cause of death and the number one cause of permanent disability. But there is good news. Forsyth Medical Center offers the latest in stroke treatments, a dedicated stroke program and a team of specialists on-call 24 hours a day. Getting to Forsyth Medical Center within minutes of a stroke onset can greatly reduce the chance of permanent disability or death.

If you experience one or more of the symptoms below, you may be having a stroke. Call 9-1-1 and get to Forsyth Medical Center immediately.

- Sudden numbness, weakness, or paralysis of the face, arm or leg
- Sudden confusion, difficulty speaking or understanding
- Sudden dizziness, clumsiness or loss of balance
- Sudden blurred or decreased vision
- Sudden severe headache with no known cause
