

## ADMINISTERING

more than **32,000** vaccine doses to frontline workers in our health system and to our patients age 65 and older—with **20%** of the patients among historically marginalized populations at greatest risk from infection. As we continue to follow state guidelines for vaccinating priority groups, we look forward to opening up vaccination opportunities to everyone.

## CARING

for our patients across our health system by providing more than **220,000** COVID-19 tests and helping more than **1,800** hospitalized COVID-19 patients return home to their loved ones.

## PARTNERING

across our community with other health systems, county health departments, governmental organizations and local businesses, churches and faith groups—to vaccinate everyone eligible, particularly those most at risk. We are dedicated to participating in Town Halls and educational events while providing vaccine doses, site locations, and/or staffing to support community vaccination events. We also work with our Atrium Health partners to access and distribute vaccine to historically marginalized populations. Thanks to these and other efforts, Forsyth County ranks among the state's leaders in the number of residents vaccinated.

## LEADING

or participating in more than **50** active or completed COVID-19 research studies, including a Phase 3 trial evaluating the safety and effectiveness of the Moderna vaccine. We work specifically to include traditionally under-represented populations to ensure that all of these vital research studies include members of our entire community.

## REACHING

out through our Division of FaithHealth and the Maya Angelou Center for Health Equity to involve local churches, the Hispanic League and other groups to inform the Black and Brown communities about the safety and effectiveness of the vaccine. Our outreach includes vaccinating the homebound who are **65** and older and their caregivers, with **42%** of patients and **33%** of caregivers from historically marginalized populations.

## ENSURING

equitable access to the vaccine across our community:

- Helping to staff and organize vaccine events with Forsyth County's Federally Qualified Health Centers, with **92%** of vaccines going to these populations.
- Holding weekly vaccine clinics at Wake Forest Baptist's Downtown Health Plaza, with **23%** of vaccines going to these populations.
- Holding a weekend event in High Point at Providence Place where **more than 40%** of those vaccinated were from under-represented populations.

Committed to the health of all, every day.
